

For over 75 years, DCL has been providing the oil & gas, marine and construction industries products, services and solutions to lift, anchor, secure and protect client assets.

Anchor Chain & Anchors

DCL offers for sale or rent all sizes of anchor chain, anchors, connecting links, swivels & other fittings to moor any vessel. DCL can meet any anchoring requirement through its large inventory of new and used mooring materials.

Lifting Products

DCL is the leading fabricator of all size Twin-Path® slings, wire rope slings, synthetic slings, nylon web slings and chain slings. Utilizing swaging capabilities to press up to 4 ½ inch diameter wire rope, serving as a leading authorized Slingmax® sling fabricator and with capabilities to produce synthetic round slings of all sizes, DCL can fabricate slings to lift anything in the world.

Mooring and Towing Products

DCL offers a broad line of buoys, marine fenders, bitts, chocks, composite dock piles and timbers, release hooks and Marquip® tow plates and towing shackles to meet any vessel or shore requirement. Utilizing its expansive mooring and towing product knowledge, supplier network and resources, DCL can source all sizes and capacities of mooring and towing products to safely protect and secure your marine assets.

Wire Rope and Rigging Products

DCL provides all sizes of shackles, hooks, thimbles, mooring sockets and other wire rope and synthetic rope hardware and fittings. DCL sets industry standards with a full line of proprietary products such as the LBNO "Pee Wee"®, LBNO hawser thimbles, LBNO rope thimbles and Workhorse synthetic rope connectors.

Testing and Inspection Services

DCL provides offsite and onsite inspection, proof-testing and break-testing of slings, rigging hardware, wire rope, synthetic rope, baskets, skids and other cargo carrying units (CCU's) to keep customer's lifting gear compliant. DCL utilizes fully trained Level 2 and Level 3 inspectors to provide non-destructive testing (NDT) services. DCL operates 4 stationary and portable proof-test units with pull-testing capacities from 500,000 pounds to 3 million pounds. In addition, DCL offers RFID tagging and inventory management services powered by TESSALink software, which allows our clients remote 24/7 accessibility of their inventory and certifications.
