

ATLAS®

SPECIFIC PROPERTIES

high breaking load

best spooling on winches

easy handling

design: 6 strand with filling thread

type of lay: cross

The ATLAS®-mooring rope allows fast and safe mooring.

The ATLAS®-mooring rope

has optimized elongation characteristics

offers high dynamic load resistance

is very compact and dimensionally stable

has very good abrasion resistance

achieves very high fatigue strength under reversed bending

is maintenance-free

can be stowed while wet

is designed for use on automatic winches

Ø mm	rope weight kg/m	MBL Mp	MBL kN
