

Why Landa Detergents Are Recommended Over All Others for Hot and Cold Water Pressure Washing

Landa detergents contain the most advanced formulas engineered to be used with high-pressure cleaning equipment.

Most of the 37 blends contain an exclusive multi-metal corrosion inhibitor package designed to protect your equipment as well as prevent flash rusting while cleaning.

Furthermore, all the Landa detergents are biodegradable and include a special additive to prevent scale build-up.

The liquid—and some powder—detergents come in 5-gallon pails and 55-gallon drums with other powder formulas shipped in easy-to-handle cartons.

The highly concentrated Landa detergents can be diluted at ratios of well over 100:1 making the cost-in-use very economical. Mix kits are also available.

All packaging complies with U.S. and Canadian regulations.

ALL-PURPOSE CLEANERS: With Versatility to Tackle the Toughest of Jobs
