

Eats Rust. Spits Bolts.

Free All spreads deep into rusted and frozen parts, freeing them faster and easier than any other penetrating oil around.

What our users say:

I appreciate having high-quality tools and products. Free All Deep Penetrating Oil stands shoulder to shoulder with the rest of my tools.

John S., Boonville, IND.

I am rebuilding a 1950 Chevy half-ton with a lot of rusted bolts that are tight. Free All Deep Penetrating Oil cut and dissolved the rust in minutes, making it easy to remove the bolts. I would recommend it to anyone.

Robert A., New Galilee, PA.

I use Free All on my under-maintained equipment. Since I have used Free All, there's never been a nut that hasn't come loose. This product even freed a pair of channel locks that I found buried in the yard. Free All blows its competition out of the water.

Daniel B., Chattanooga, TENN.

The BEST penetrating oil I've used in the 37 years I've been in business!

Glenn Y., Sidney, OHIO

FREE ALL[®]

— The Rust Eater —
DEEP PENETRATING OIL

Three active components get the job done!

SEEKING AGENT

delivers the lubricant faster and farther

The Rust Runner

This highly mobile, ultra-low viscosity, slow-evaporating “seeking agent” delivers the lubricant faster and farther than typical solvents. This means more lubricant arrives at the scene before the solvent evaporates.

35%

Delivers
3X
more lubricant

The Lubricant

Free All contains significantly more lubricant by volume than the competition, so there's more loosening agent attacking those rusty bolts.

35%

Ingredient
literally
EATS RUST

The Rust Eater

This highly refined, naturally occurring ingredient literally eats rust. The Rust Eater also provides its own lubricating film, so it acts as its own delivery agent – and it doesn't evaporate, so it keeps going till the job is done.

30%

Before & After

Safer to use

Harsh solvents found in other penetrating oils can destroy various plastics, so you have to be extra careful when using their products. Free All uses far less solvent – and a less caustic solvent – making it safer to use.

- SAFE ON PAINT
- BODY SHOP SAFE
- SILICONE-FREE
- SAFE FOR PLASTIC PARTS
- LESS ODOR

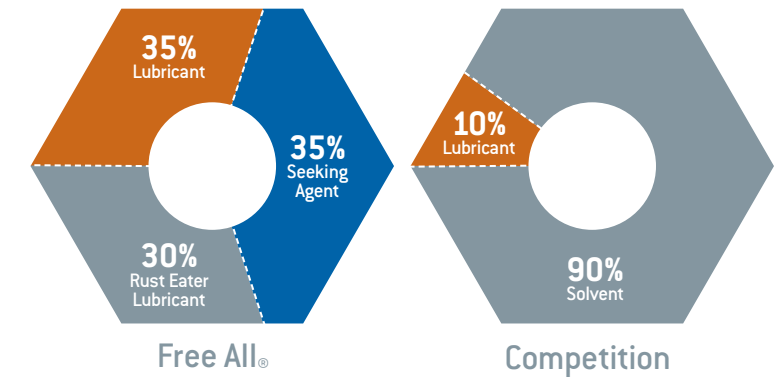

Guaranteed to outperform

Free All comes with the amazing **Free-For-All Performance Guarantee**. If you're not satisfied with Free All, we'll buy it back, no questions asked. That's how confident we are in how Free All performs.

Free All® vs. the competition

Free All works faster and better than any other penetrating oils

Other brands are made up mostly of solvent, because it's a cheap way to deliver the penetrating agent to rusted bolts. And, because solvents evaporate so quickly, the part of the lubricant undelivered to the bolt is rendered useless.

Use less effort

Independent tests confirmed that, with Free All, rusty bolts required an average of **30% less torque** to break free than with the next best penetrating oil.
