

Whatever the demand for equipment parts, we endeavour to match your requirements within the shortest possible timeframe.

Spare Part Delivery

- No matter what brand the equipment used in your installations is.
- Timely international delivery.

Logistics Support

- Establishment of logistics files (Amos, ILS ...)
- Calculation of MTBF, MTTR
- Estimate of your spare part requirements over 1 year, 2 years, 5 years...
- Establishment of maintenance instructions (task completion time, skill-level, required tools...)

We will use all our skills for your maintenance or retrofitting requirements in any of the following areas:

- Air Conditioning
- Refrigeration
- Electricity
- Control Systems
- Pipework

We will always support you with the appropriate solutions.

Scheduled Maintenance Services

- After the required design and preparation stages, our team of professionals will come while the ship is in dry-dock to practically implement your complex operations.
- We will adjust ourselves to the global planning of this technical stop-over.

Retrofitting

- From advice to contracting, we take on all types of new installation and changes to existing HVAC and Refrigeration installations.
- Modification of existing installations.
- Integration of new installations on operational ships.
- Retrofitting of CFC HCFC refrigeration fluids.

Remote Monitoring of Installations

- We can offer remote control as an option operated by software compatible with your installations.
- This secure connection allows us to perform targeted diagnostics and respond rapidly in order to optimise the performance of the HVAC installation.
