## Spare Parts and Repair Services

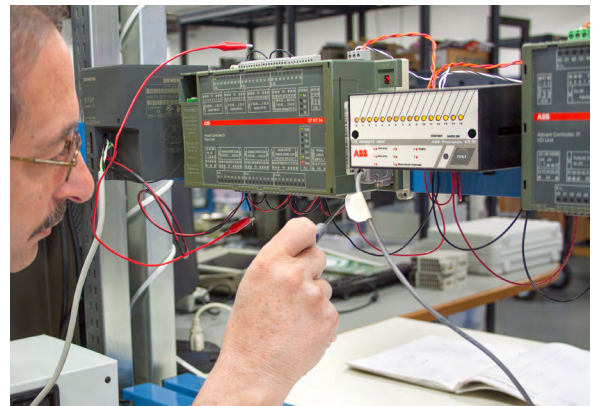

**Classic Automation** supports your installed control systems, drives, and servo motors with repair services and spare parts from our large inventory of surplus parts and drives. Many new hardware and software products are distributed to support your existing automation equipment or use the latest technology. We have a knowledgeable staff, extensive test facilities, and all of our surplus parts and repair services come with a 2-year warranty.

### PLCs, Operator Panels, Servo Motors, Power Supplies, Drives, and Electrical Equipment

#### Fully Tested

Siemens S5 and S7, Simadyn D, Micromaster, SIMOVERT and SIMOREG drives, Moore APACS, ABB Master, Advant OCS, Synpol D, and Procontic CS31, Allen-Bradley, Omron, and Telemecanique. Many other control systems and drives are supported.

*We Help Keep The World's Production Running!*
