# APS GROUP

AME is engineered by APS Finland for Asia Channel Business.

AME capitalises APS's cables design house and it's B2B factory level of productions platform around Asia, Eastern Europe and Turkey that are typically out of reach by many. Factories that have been producing for EU with strict quality governance.

The production platform and EU quality standards are monitored by APS. This approach is to allow customer to enjoy the EU design at Asian pricing.

Having the support from APS Finland, AME is by large having the support for designs, productions and supplies with a wide range of power, instrumentation, control, fibre optics, Ethernet and special cables. Extending to CCTV, accessories, components, switches and engineering applications.

Quality of works have been strictly governed by APS leading strict directive protocol standards.

AME is a fast-expanding brand and recognitions by customers that are getting the true value of products-line.

AME data communications confidence level escalated to an assured level that they are utilized, approved by both cables branding APS Finland and TECNİKABEL Asia Pacific. To attest to the quality allows APS data components of accessories and connectivity solutions to compliment AME cables product line to complete the 25years Installations Systems Warranties T&C APPLIES.
