DIGITAL SOLUTIONS MARITIME FOCUS

MariApps Marine Solutions, a member of The Schulte Group, is a technology solutions company offering state-of-the-art marine enterprise solutions for ship managers and ship owners. MariApps offers key knowledge and expertise that will help your organization excel in today's competitive and demanding environment. MariApps' flagship product, *smartPAL*, is a complete marine ERP suite which is fully web-based, cloud supported, and mobile compliant.

Headquartered in Singapore, with a development center in Kochi, India, and offices in India, Germany, Cyprus, Dubai, and Greece. MariApps is a Microsoft Gold Certified Development Partner. Certified by Deloitte with ISAE 3402 – Type 2 certification for enterprise standard development and operating framework readiness to deliver systems, MariApps follows SDLC and Agile methodologies to deliver projects. MariApps is also certified by Lloyds Register PMS Type Approval with a software development center in Kochi, India, MariApps has 500 + employees worldwide.

Adheres to leading project management standards (PMI) to execute projects and the dedicated Project Management Office (PMO) manages projects for various customers. MariApps frequently engages with various leading external consultants across the world to review and ensure the quality of various software it builds and, in this way, MariApps delivers high quality maritime solutions.

Certified by

ClassNK

Deloitte ISAE 3402
CERTIFIED TYPE II

smartPAL is a web-based ERP software covering all areas of ship management and ship owning. Designed to facilitate higher performance, faster implementation, and easier maintenance. With *smartPAL* you will achieve the 'single version of the truth' having all your data on one platform to enhance your organization's performance and profitability. Access *smartPAL* anywhere, anytime around the globe.

smartPAL MODULES

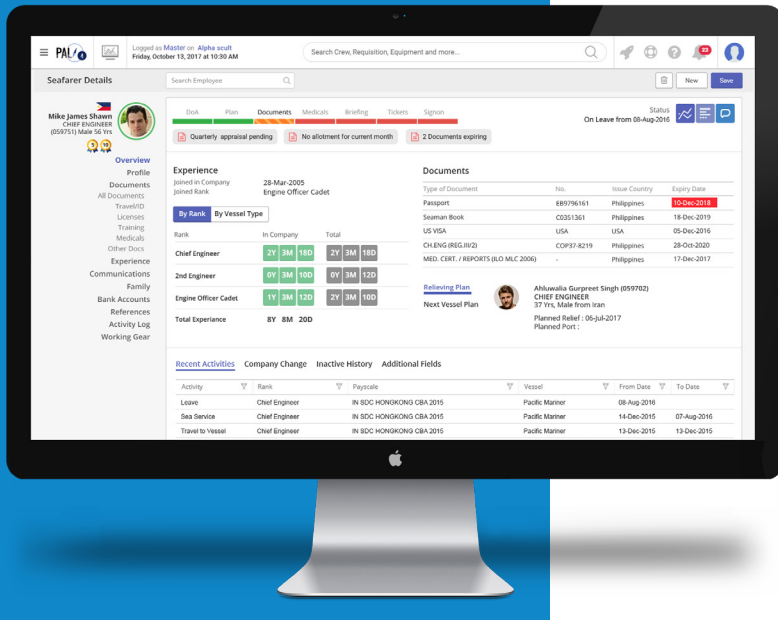

WHY CHOOSE smartPAL

- ✓ A unique product covering all functional areas of the ship management domain
- ✓ A web-based ERP designed for prompt implementation with plug and play options
- ✓ Intuitive, easy to use, and highly customizable, with built-in interfaces, serving as a bridge to banks and vendors
- ✓ Comprehensive video-based training module with built-in self-assessment functions
- ✓ smartPAL is built with optimized processes and workflows to improve productivity
- ✓ A customizable dashboard facilitating data-driven decision making and management through KPIs

CREWING

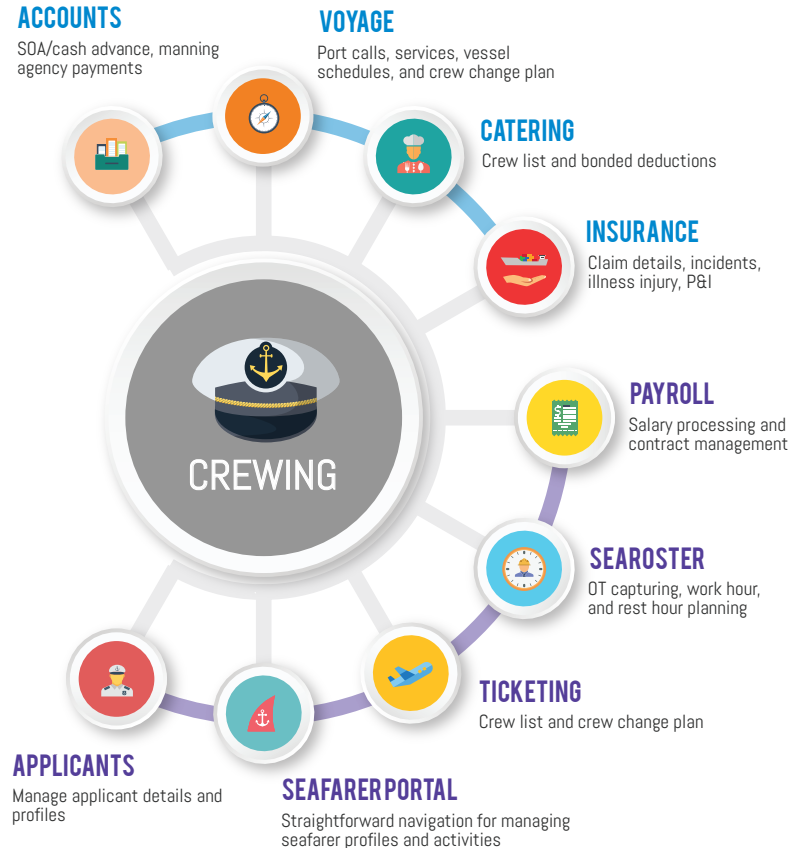

Centralized management of activities and data of seafarers onboard and ashore. Manages employee contracts, payroll, documents, training, claims, expenses, and activities. Year-round activity tracking for salary and fee-based employees.

- ✓ Cloud-centric workforce management supported with mobile apps to track overall crew details anywhere, anytime
- ✓ Crew management made seamless via Applicant portal, with consistent data integration to other modules like Crewing, Ticketing, SeaRoster, Payroll, Voyage, Purchase, Accounts, Insurance, Catering, and Seafarer portal
- ✓ Custom dashboards with dynamic views for quicker analysis and more efficient decision making
- ✓ Integration with third party vendor systems like Seagull, Videotel, OCIMF, Q88, and various other systems for effortless data processing
- ✓ Graphical planning of seafarers as per vessel requirement document checks. Provision to select crew based on Management requirements and Owner specifications
