

UNWAVERING RELIABILITY AT SEA WITH BITZER MARINE SERVICE NETWORK

CALM WATERS WITH THE BITZER MARINE SERVICE NETWORK

Ships have an average service life of 20 to 25 years and require dependable service activities to ensure reliable functioning for all that time.

With the Marine Service Network (MSN), BITZER provides ship operators with a service network of specialized external service partners.

As a member of Bitzer service network, we pledge to keep

**“WE ARE THE SERVICE CENTRE OF
BITZER PRODUCTS IN GREECE.”**

Prompt service:

- // our base of operations is located close to Piraeus and Perama ports.

Guaranteed qualified service:

- // exclusive use of service technicians with many years of expertise and BITZER training. Repairs and maintenance only in accordance with defined BITZER quality standards.

our service technicians up to the strict quality standards of Bitzer (and) providing them with constant quality training.

SERVICES IN ALL MAJOR PORTS

BITZER MSN is all about reliability of service in all major ports worldwide, large stock of genuine spare parts and fast delivery.

As a service partner, we are building a fast growing network of services in all Greek ports with a base of operations close to Piraeus port.

RELIABLE SERVICE FOR YOUR SYSTEMS

Fast spare parts delivery:

- // Worldwide
Only original spare parts are supplied at all times.

Service data at hand:

- // the Bitzer central database enables all service partners and us to access all service activities done easily at any time.
