**YOUR
OPENING ON
THE WORLD**

A single solution that
combines seas and mountains.

The best solution for
all environments.

The profiles and automatism made entirely of 316 Stainless Steel, make this type of doors perfect for installation in marine, wet and SPA environments.

THE DOOR

The immersion doors are made with 316 Stainless Steel profiles, available in glossy and satin finishes.

For outdoor door are available glossy, satin, painted and Teak cover.

THE GLASS

The extra clear glass allows an excellent view of the outside panorama and the entrance of an excellent amount of natural light.

This type of doors has already been installed with excellent results on cruise ships and in many hotel SPA.

THE AUTOMATISM

The track is made of aluminum with anti-corrosion treatment, while the mechanic parts are made of 316 Stainless Steel.

The electronic components are IP66 protected, installed in special boxes, perfect for installation in this type of environment. Two types of installation are available: on-board the machine and remote-controlled for maintenance.

Two versions are available: single engine or two engines. Both have a maximum load of 400 Kg per door.
