## INTERNATIONAL SHIP SUPPLY & CATERING MANAGEMENT

As Akira International, we are specialized provider of International Ship Supply and Catering Management to the maritime industry. With years of experience, we offer our customers high-quality services and a wide range of products worldwide. By providing comprehensive provisions, technical materials for merchant and offshore vessels, as well as expert catering solutions, we meet our customers' needs at the highest level.

Thanks to our constantly developing and expanding supplier network, we serve various ports worldwide. Our activities in challenging geographical areas such as South America, Africa, and the Caribbean have increased our visibility and strengthened our reputation for reliability.

At Akira International, we prioritize environmental sustainability and responsibility. With a conscious effort, we offer eco-friendly products and services, striving to minimize environmental impacts in our supply chain processes. We also encourage our customers to contribute to these efforts.

Customer satisfaction is our top priority, and we consistently maintain the highest quality standards to achieve it. Whether it's ensuring the reliable delivery of ship supplies or providing top-tier catering services, we take pride in showcasing our success stories and customer references, highlighting the value and reliability of our work.

Emphasizing the importance of technology and innovation, we closely follow industry developments and utilize the latest technologies. By providing our customers with the most advanced products and catering solutions, we offer effective strategies to meet their diverse needs.

We aim to establish strong communication with our customers and provide them with the best support services. Our communication channels and emergency support hotline are always open, ensuring easy accessibility for our customers whenever they require assistance.

BRIGHT & CLEAR

Akira International, makes customer satisfaction a company tradition, we commit to the customer to exchange the products at the next port, based on concrete evidence on quality-related problems. Hereby, the delivered product in any port of purchase does not compromise the satisfaction of the crew and the customer, since it can be exchanged without waiting for the ship to return to the same port.
