01 Introduction Of Bona Marine (Taizhou)Co,Ltd

Background of the company

Bona Marine(Taizhou)Co.,Ltd. is a group of experienced engineers and technicians who focus on providing comprehensive ship maintenance and repair service.

Service Content:

Our service covers everything from routine maintenance to emergency repairs , ensuring that ships perform at their best under all conditions.

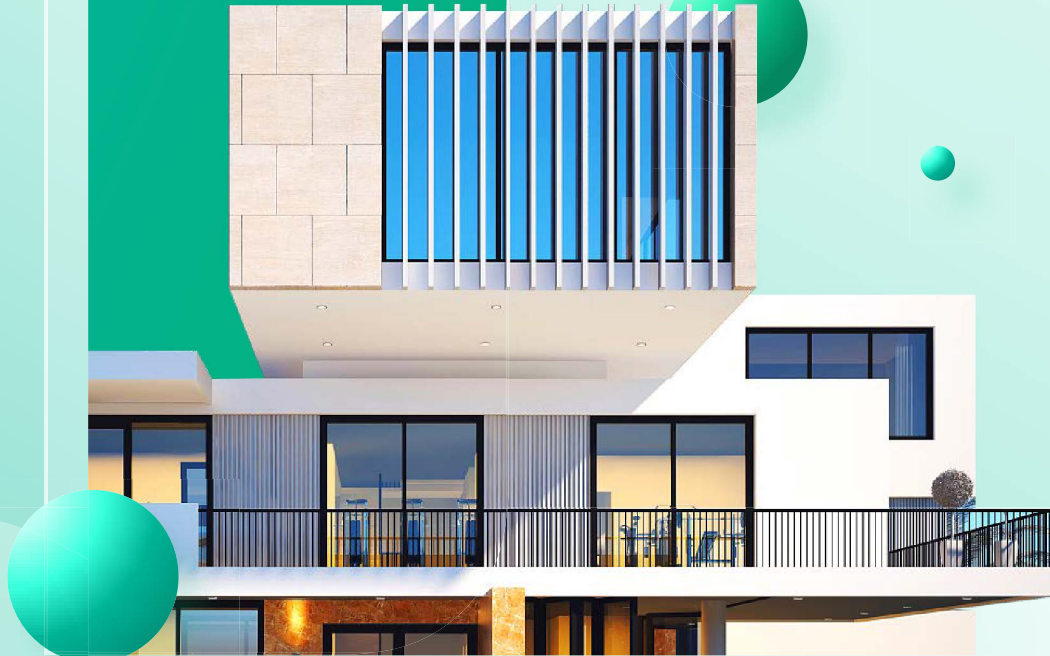

02 Ship Maintenance And Repair Services

Bona Marine has a wide range of services, covering all ship aspects of maintenance and repair.

The following is the specific content and commitment of the companys main service types:

02

主机/辅机/锅炉维修

ME / AE / Boiler maintenance

01、ME Repair Service

Bona Marine provided ME maintenance services for the oil tanker. During the week-long repair process, our team of engineers successfully repaired the main engine's fuel system, ensuring that the ship could continue its range safely and efficiently.

02、Electric Generator Repair

We made repairs for a container vessel. By adopting advanced diagnostic tools and maintenance techniques, we not only improved the maintenance efficiency, but also ensured the safety of the maintenance process and avoid potential safety risks.

03、Boiler Repair

When maintained the boiler system of the bulk Carrier, we found and repaired several potential safety hazards, including the combustion efficiency problem of the boiler and the failure of the pressure control system, ensuring the safe operation of the ship.

Air Conditioning and Refrigeration System Maintenance

Air Conditioning Repair

We provided full maintenance of the air conditioning system for a refrigerated vessel. By replacing the aging parts and optimizing the system settings, we ensured the stable operation of the refrigeration system in extreme climate conditions and ensured the quality of the goods.

Refrigeration System Maintenance

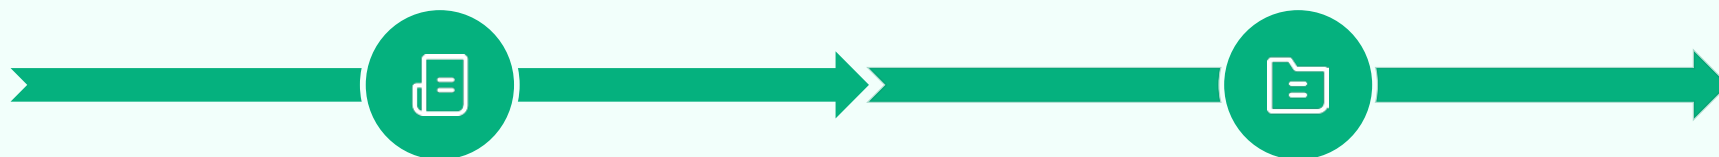

During the routine maintenance of the refrigeration system of a fishing vessel, we found and repaired the refrigerant leakage problem, avoided possible cargo losses, and extended the service life of the system.

Ballast Water Treatment System Repair

Bona Marine made emergency repairs to the ballast water treatment system (BWTS) for a bulk carrier. We quickly diagnosed the system fault and completed the necessary maintenance work in a short time to ensure that the ship meets the latest environmental standards of the International Maritime Organization (IMO).

**Environmental compliance
improve**

**BWTS Repair and
Maintenance Case**

We have upgraded the ballast water treatment system for a oil tanker to meet the latest environmental regulatory requirements. By upgrading the system, we have helped ships meet more strict emission standards and ensure environmental compliance.

03 Overview of Ship Spares

001 Heat Exchanger: Efficient heat energy conversion

Our heat exchanger can achieve efficient heat energy exchange, to ensure the normal operation of the equipment of the ship

It can effectively use heat energy in operation to improve energy efficiency.

002 BWTS: Environmental protection and safety, meet the requirements of IMO and USCG

Providing BWTS equipment, 3D scanning and retrofitting design, installation and maintenance services.

003 Various spare parts: to meet different needs

We supply a wide range of ship spare parts, from heat exchangers to ballast water treatment units to various pumps, valves, filters, anchors, anchor chains, lifesaving equipment, etc., to meet the specific needs of different ships and different sea environments.

001 Heat Exchanger: Efficient heat energy conversion

Air conditioning evaporator

Air conditioner heater

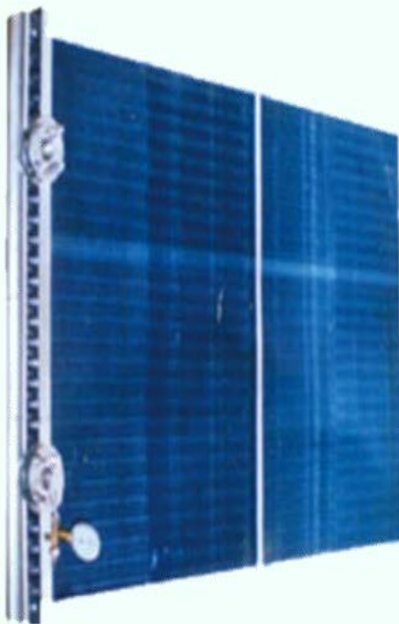

Plate Cooler

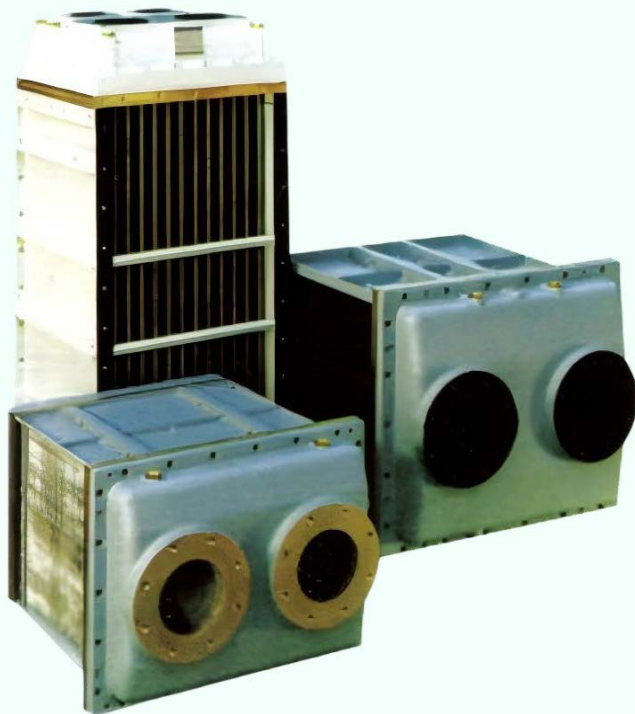

Rubber gasket

001 Heat Exchanger: Efficient heat energy conversion

Air Cooler

Steam / Electric Water Cabinet

001 Heat Exchanger: Efficient heat energy conversion

Crane oil cooler

Diesel radiator

Cargo heater tube bundle

Air conditioner condenser

002 BWTS: Environmental protection and safety, meet the requirements of IMO and USCG

Providing BWTS equipment, 3D scanning and retrofitting design, installation and maintenance services.

003 Various Spare Parts: To meet different needs-1

We provide a wide variety of ship spare parts, from heat exchangers to ballast water treatment system, to various pumps, valves, filters, anchors, anchor chains, lifesaving equipment, etc., to meet the specific needs of different ships and different sea environments.

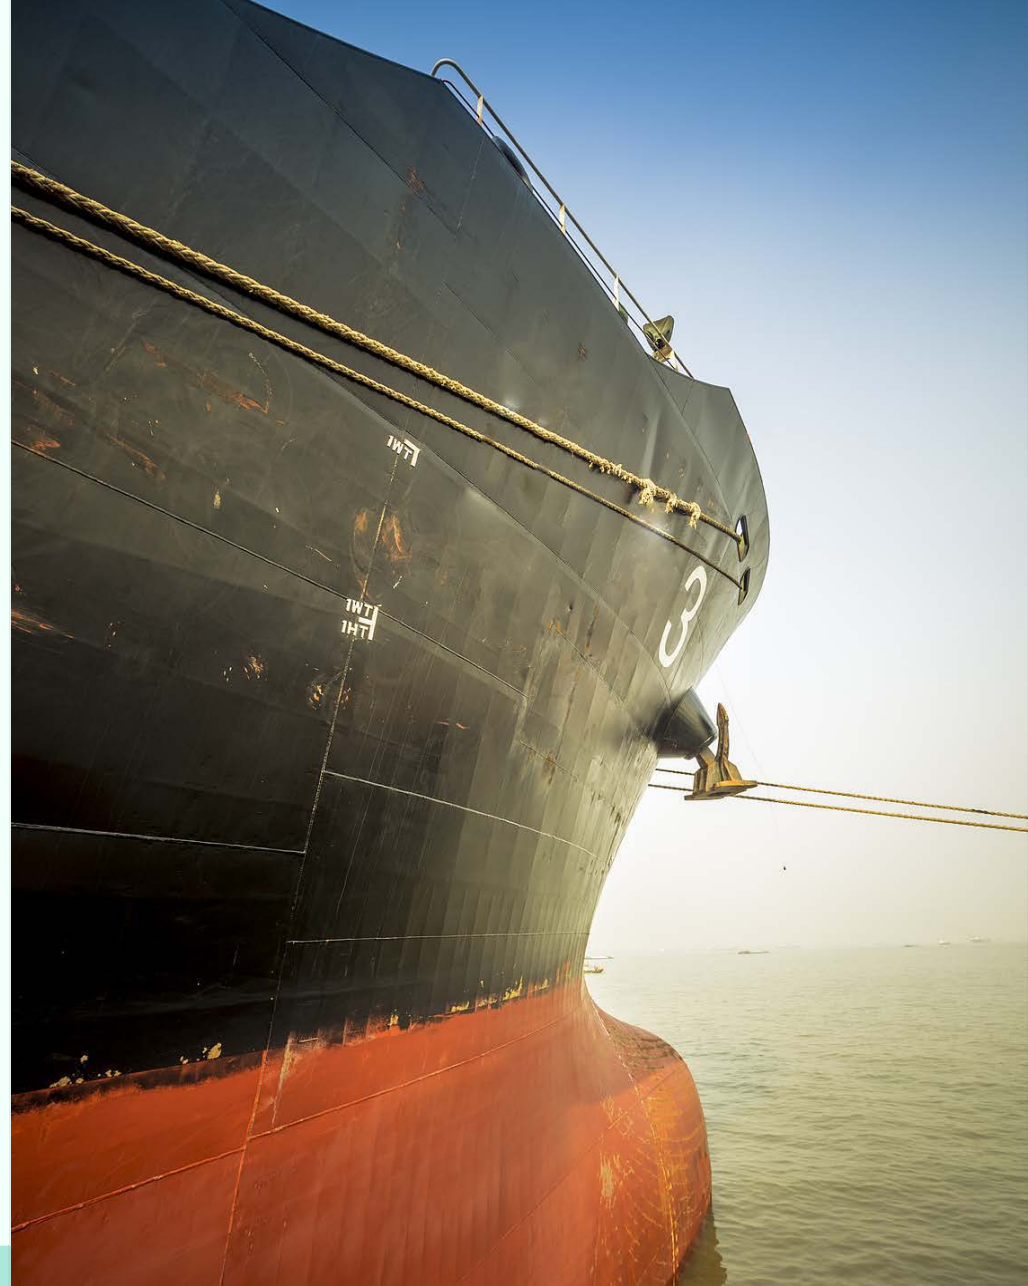

04 Customer service and support

001 24/7 Customer support Center

Bona Marine has established a 24 / 7 customer service support center to ensure that customers can get timely help at any time. For example, we provided real-time technical support for a ship experiencing an emergency at sea to help it return to port safely.

002 Customer feedback and continuous improvement

We value customer feedback and use it as an important basis for service improvement. Through regular customer satisfaction surveys, we constantly adjust and optimize the service process to better meet customer needs.

05 Company contact information and address

Company address

Bona Marine (Taizhou) Co., Ltd. is located in Huangqiao Town, Taizhou City, Jiangsu Province.
