## Better pump performance with genuine spare parts

Hamworthy Pumps, a part of Svanehøj Group is a in-line pumps for the marine and offshore industries. More than 7000 vessels worldwide rely on our pump solutions, renowned for their reliable and time-tested quality.

When choosing genuine spare parts from Hamworthy Pumps you get the trusted quality that you know and expect from our pumps. Designed for our pumps specifically, we supply components that

are guaranteed to fit the pumps' exact specifications and thus ensure optimum performance and minimise critical downtime – a guarantee that you don't get from third-party suppliers.

Don't let non-OEM spare parts be the weakest link in your operation – secures uptime with original parts and technical support from Hamworthy Pumps's global service network.

## Don't just maintain; optimise

Spare parts are critical to your operation, and it is not 'one size fits all': compromising on quality can be a costly business. While non-OEM components may look the part, they often come with a significantly higher total cost of ownership than original parts.

Hamworthy Pumps Service offers spare parts that are designed to match exact profiles and tolerances, making

them the only right fit for your pumps. The components are made from premium-quality materials suited for demanding applications and continuously improved to keep up with the latest innovations in material specification. This means that our original spare parts don't just serve to maintain performance; they optimise it.

# Rapid and reliable global service

When choosing Hamworthy Pumps Service as your spare part supplier you also choose our technical know-how and expert advice which is available to you 24/7. We respond to enquiries rapidly, and thanks to our Global Service Network we can be on-site within a maximum of 24 hours. In order to guarantee fast delivery, we have large stocks of critical spare parts which can be supplied globally from Singapore.

Moreover, our technical support hot-line is always open. Use it and get advice regarding correct maintenance when at sea. We also offer on-site training and assistance in using our pumps and spare parts to make sure that you can properly operate the pumps and reduce potential maintenance costs in your day-to-day operations.
