

ONE STOP PROVIDER OF **MARINE SERVICES**

We have built a reputation for excellent service over the years by ensuring that our customers' equipment are fixed on time

Established in 1976, Jason Electronics has grown to become a leading provider of integrated solutions for marine communication, navigation, and automation systems. With our headquarters in Singapore, we are able to be a full-service provider and our team of engineers is capable of developing customised system integration, and a full suite of turnkey and innovation solutions.

We also specialise in navigation, communication, and automation systems, statutory radio surveys, annual performance tests for VDR, and after-sales services.

Our Service Philosophy - One Time Fixed

With our team of factory-trained engineers, coupled with more than 40 years of experience in the field of communication, navigation, and automation, we are able to provide fast and efficient services to our customers worldwide.

We provide a global one stop solution

Our commitment to excellence and safety are backed by the ISO 9001:2008 Quality Management Systems and OHSAS 19001 accreditations, ensuring consistent and quality service to our customers.

We have built a reputation for excellent service over the years by ensuring that our customers' equipment are fixed on time before their vessels leave the port.

Jason has also developed a strong regional presence in markets such as India, Indonesia, Malaysia, China, South Korea, and Thailand. This enables us to serve our customers in the region under shorter notice with reliable technical support.

to our customers with a service contract to ensure peace of mind no matter where their vessels are.

As a Satellite Solution provider, we manage your IT assets and bandwidth onboard. We are able to provide crew welfare and help shipowners to manager communication cost.

SECURE YOUR PEACE OF MIND

Reduced Repair Cost

Reduced downtime/workload to vessel and ship's crew

Increase vessel's productivity

Ensure optimum equipment performance

Managed bandwidth usage

Remote help desk 24x7 and remote trouble shooting
