

THAMES DIESEL

MARINE DIESEL INJECTION AND ENGINE PARTS

OMC2 DIESEL

Thames Diesel are the UK distributor for OMC, manufacturer of top quality replacement fuel injection equipment to suit a wide range of engines.

OMC produce high quality elements, nozzles, delivery valves and many other fuel injection spares.

OMC2 diesel spare parts are suitable to the world's most popular types of four-stroke diesel engines for marine applications. All our nozzles, elements and delivery valves are designed to satisfy the specific and exclusive demands of each one of the following branches:

- | | | |
|------------------|------------------|---------------------|
| * Cruises | * Pleasure boats | * Towing and rescue |
| * Ferries | * River sailing | * Dredging |
| * Cargo shipping | * Ocean sailing | * Fishing |
| * Navy | | |

Contact us on +44 (0)208 502 4600 or sales@thamesdiesel.co.uk.

Thanks to the variety of our marine production, developed during our over 50 years on the market, we can not only supply our customers with the latest products, but also with more dated items, even the ones that were set out of production by their mother companies.

In general, due to the optimal price/quality ratio of its products, OMC2 can significantly contribute to reducing its customers' maintenance costs, without them having to relinquish their quality requirements, to which they are compelled by the increasingly strict IMO regulations.
