

# Instrument Service

**Grønbech & Sønner's service organisation has extensive experience and competence within hook-up, faultfinding, test and calibration of both mechanical, pneumatic and electrical instrumentation products.**

## Service

Our expertise comprises:

- Transmitters:
  - Pressure & temperature.
- Actuators, converters and positioners:
  - Electrical, hydraulic and pneumatic.
- Gauges, indicators etc.

## Service Contract

We perform service either on-site or at our service center, and we can offer you a service contract customized to your needs - either covering the regular service of all your instruments or only part of them.

A well-functioning service contract with Grønbech & Sønner will optimize the performance of your processing plant and ensures that you have the absolute best basis for your plant safety and product quality.

## Traceability and quality

Grønbech & Sønner's test equipment and service instruments are maintained and calibrated by authorized test laboratories, which enables us to offer traceable maintenance.

As an ISO 9001 certified company our test procedures are clearly described, assuring you the best quality available.
