

# Pumps

**Grønbech & Sønner A/S supplies centrifugal pumps and positive displacement pumps for all lines of business.**

## Pumps

With products from KSB, Sera, Almatec and Ponndorf we can solve various kinds of pumping tasks. Whether you need a large feedwater pump for a supercritical power plant or a pump for more simple tasks, our suppliers offer a very broad range of products, and thus we can supply submersible pumps, oil pumps, cooling water pumps, sewage pumps, diaphragm pumps, piston pumps, hose pumps, centrifugal pumps, and many more.

## Pump service

Grønbech & Sønner does not only supply components – our experienced staff in the service departments also offers you commissioning and maintenance of the components and can carry out retrofitting of your pumps to ensure that they are upgraded and run at their optimum duty points.

## Positive displacement pumps

Many of the pumps we supply have integrated steerings and variable strokes.

Apart from supplying pumps, we also offer complete dosing systems, that are produced in our in-house workshops, are CE-labelled and include risk assessment.
