*Particle counter. Oil quality monitoring according to ISO standards.*

# Lekang filtersystem (LFS) manages filters for all equipment

For more than 30 years, we have built a unique database of filter data, machines and e-commerce.

## LFS benefits:

- Correct filters for machines and equipment
- Filter mapping and updated machine lists
- High quality filters for optimal machine protection
- All filters from one supplier
- Easier maintenance and lower operating costs
- Filter cross-references and technical data
- E-commerce

*Simplified filter maintenance with machine lists and filter packages for each coast guard vessel.*

Lekang Filter is the preferred supplier to three Norwegian Barents Sea classified coast guard vessels, and Tom-Eigil Olavsrud at Lekang Filter has mapped all filters on KV Bergen, KV Barentshav and KV Sortland.

*"With complete machine lists for each vessel it is much easier for everyone in the machine department to order the correct filters" says Chief Technical Officer, John Henrik Steinsvik.*

## 50 years in the filtration business

In 2020 it is 50 years since the establishment of Lekang Filter. We are proud of our history. At the same time, we are humble towards customers' demands and wishes. Our latest customer survey shows that customers have great confidence in us, and 9 out of 10 say they will recommend us to others.
