

Ocean Electronics supplies
everything in electronics for vessels

- Navigation and steering
- Maritime Radio/GMDSS
- Fish finding equipment
- Satellite TV/antenna equip.
- Bridge solutions
- Satellite communication/V-Sat
- Alarm systems/monitoring
- CCTV/camera surveillance
- Technical drawing /documentation

Bridge solutions

We tailor bridge solutions to your needs and wishes.

- Ergonomically correct
- Easy to use
- Safe operation
- Technology of the future

NAVIS
ENGINEERING

Steering-Autopilot-Joystick Pilot
Dynamic positioning

Easy to learn, easy to operate.

Can be linked to majority of standard control / thruster / motor control

- Farming, feeding craft, live fish carriers, work boats
- Ferry, "Auto Crossing"
- Service vessels for wind turbines
- Fishing boats
- High speed crafts

TOKYO
KEIKI

Tokyo Keiki TG 8000, Gyro Compass

- Fast follow-up rate (max. 75°/s)
- Fast serial data output (IEC61162-2)
- Interfaces with external heading sensor
- Minimal system components for dual gyro system for space saving & installation cost
- Startup-timer function

Tanker · Freighter · Fishing boat
Live fish carrier · Offshore · Ferry
Feeding craft · High speed craft · Work boat

- sale
- installation
- service
- retrofit
- of all types of vessels

Sales, installation and service

Ocean Electronics is a highly qualified supplier of electronic equipment and services for maritime communication and navigation, and is among the largest companies in Norway in the field of maritime electronics. We sell electronic equipment for navigation, steering, communication, fish finding, monitoring and safety for all types of vessels. We have a long tradition offering equipment solutions from the very basic to large integrated bridge systems, tailored to the customer's needs.

Our goal at Ocean Electronics is to follow our customers throughout a vessel's lifetime – regardless of trade area. With departments in Måløy, Florø and Bergen, we always have people on hand to provide excellent service to the vessels. From our premises, we have easy access to the entire world, both for shipments of goods and our own service engineers.

«Our goal in Ocean Electronics is to follow our customers through a vessel's lifetime – regardless of trade area.»

Important focus areas for Ocean Electronics are retrofit, service and installation of electronic equipment. We have extensive experience in the design, delivery, installation and start-up of complete bridge solutions, stand-alone installations and retrofit. In addition, we are the national importer of Tokyo Keiko, Yokogawa, Saab Transponder Tech and Navis. Another important market is security systems for ports, fish farms and other marine industries.

Revolutionary development

– requires professional knowledge and flexibility

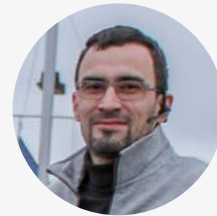

There has been a formidable development on vessels in recent years, and much of it has happened on the electronics side. The employees at Ocean Electronics are constantly keeping up to date.

We have a highly skilled staff consisting of engineers, technicians and caseworkers, with many years in the field. With departments in as many as three coastal towns in Western Norway, we have gained better capacity and more expertise in-house, which makes us more flexible on the service, conversion and installation side.

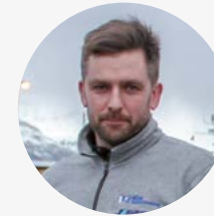

We arrange and perform service globally and locally – and spare parts are shipped all over the world.
