TRUCKS (5tons)

ATLAS, KARAT, P.P, HAWSER ROPES, CRANE WIRE ROPES

Spare Parts Transfer

- 1 We pick up the spare parts to the air port and customs warehouse by ourselves but the agent arrange the job through forwarding companies. picking up the spare parts is forwarding companies' main job so they request handing charge.
- 2 When sample bottles, important documents from companies or publications are sent us by DHL or Fedex, we deliver them without charge but the agent and forwarding companies take US \$ 60 per case as delivery charge
- 3 When we are requested to deliver a spare part from A vessel to B vessel, there's no warehouse charge. We have a appoiximately 300sqm warehouse, on the other hand, forwarding companies or agent has to keep the parts in rented warehouse so the charge has to be happened.
- 4 We can transport the spare parts up to 10 tons with our own trucks so you cas save much trucking charge.
In case 8 tons of liner or head has to be on board, forwarding companies oragent has to rent a 5 ton truck for transportation from customs warehouse to a vessel. Then minimum charge US \$ 200 happens and they don't have their own warehouse so they take out spare parts from a customs's warehouse when the vessel call. They don't use the rented truck freely and if there's any delay, more charges happen.
- 5 We control stores and spares together so owners can handle the job easily. Therefore, we usually get orders and transfer spare parts with the lowest charge.
