# **US MARINE** & Industrial Pump Repair

US Marine have specialised in marine and industrial pumps for over 30 years, working world-wide in a wide variety of industries including Marine, Petrochem, Power generation, Steel production, water treatment and many others. Our expertise in dealing with all kinds of pump and rotating equipment repairs including compressors, fans, gearboxes and electric motors will ensure the correct solution is achieved to suit your needs. Our Pudsey factory is capable of dealing with both large or small repairs, to a time frame that keeps disruption of production to a minimum.

## **Pump Repairs**

We can offer you a complete pump repair service including removal, repair and reinstallation. We have developed many innovative repair techniques designed to avoid the need to scrap expensive equipment and replace with new. Our manufacturing capability means that obsolete or difficult to obtain parts can be made and indeed improved upon, using today's superior material specifications and manufacturing techniques. We believe this offers you The Complete Solution.

## **Replacement Parts**

We specialize in the supply and manufacture of spare parts for many different makes of pumping equipment, from the UK, Europe, Eastern Europe, USA, Japan and around the world. All parts are manufactured to the highest standards using the best materials to suit your application.

## Protective Coatings

Advances in modern coating systems mean they are now an efficient, cost effective and reliable method of responding to most corrosion, erosion and abrasion problems. Our specialist coating division can advise the correct grade and application method to suit your needs.

The latest generation of coatings can provide performance enhancing characteristics that can save energy by improving the performance of your equipment.

## New and Reconditioned Pumps and Pump sets

We can offer new pumps from most of the main manufacturers in the industry and hold a large stock of reconditioned centrifugal and positive displacement pumps.

Complete systems such as Diesel Driven emergency fire units can be designed and manufactured to order.

## Additional Services

- Fan repair and Manufacture
- Electric Motors
- General and heavy machining
- Gear box Repair
