Our professional experience and technical know-how ensure prompt and flexible maintenance service both on board of vessels and at power plants.

We cover more than 44 countries worldwide.

Our maintenance service guarantees fast turn-around times and high quality solutions for all technical problems on separators.

RECONDITIONED SEPARATORS AND BOWLS

A complete oil separator and bowl reconditioning service is carried out in our workshops in Italy and Singapore.

A wide range of never-used/almost new and/or fully reconditioned separators and bowls are readily available on stock for fast turn-around response times and shipment.

All our separators and bowls can be shipped from Europe or Singapore and come with a 12-month guarantee.

Our all-round service policy implies that most of our separators and bowls

are offered also on an exchange basis and that we can provide

technical advice on replacement opportunities for old on-board separator units.

EPC CARDS

Technoservice supplies pre-programmed, never-used EPC 41 and EPC 400 units, and if needed, we will consider repairing EPC 41 and EPC 400 units.

LIST OF EPC CARDS:

EPC 41

EPC 400

SEPARATOR CONTROL PANEL AND STARTERS

TEC-2K-13 control panels have a user-friendly design that helps manage centrifugal separator operational cycles automatically.

REGASKETING SERVICE FOR PLATE HEAT EXCHANGERS

Fifty years of experience in the field imply that Technoservice, based in Italy and Singapore, offers a full Regasketing Service for plate stacks of different sizes and brands.

BOWLS BALANCING

Technoservice is specialized in dynamic balancing and vibration analysis of Alfa Laval, Mitsubishi and Westfalia bowls. We use vertical shaft balancing equipment to ensure accurate bowl balancing and test runs on oil and water for quality service that meets brand-established standards and requirements.
