

Cat® Connect Asset Intelligence

Increase uptime and efficiency.

Asset Intelligence gives you advanced predictive analytics and expert advisory services across your vessel – or across your entire fleet. The entire solution is tailored to your specific needs: which equipment is included, types of expert services, metrics, reports, and dashboards.

- Automated analytics identify potential issues before failure
- Fleet advisors provide recommendations for maintenance and operations improvements
- Analyze and track equipment condition to optimize maintenance and repair scheduling
- Optimize energy use by improving maintenance and operations
- Ensure safety and regulatory compliance

Get information to the right people.

Onboard Crew

- Onboard viewer and automated analytics for engineer and master
- Automated analytics recommendations based on real-time equipment status
- Automated data collection and analysis to avoid burdening crew

Shore Technical Management

- Automated analytics and expert advisory services provide maintenance and operations recommendations
- Marine Asset Intelligence engineers can assist with remote troubleshooting
- Customer dashboards, reports, and fleet performance analytics to prioritize across an enterprise

Cat Connect Technologies and Services give you more:

EQUIPMENT
MANAGEMENT

The value you want.

Increase uptime and reduce operating costs.

SAFETY

The visibility you want.

Enhance vessel awareness to keep people and equipment safe.

PRODUCTIVITY

The efficiency you want.

Monitor productivity and manage vessel efficiency.

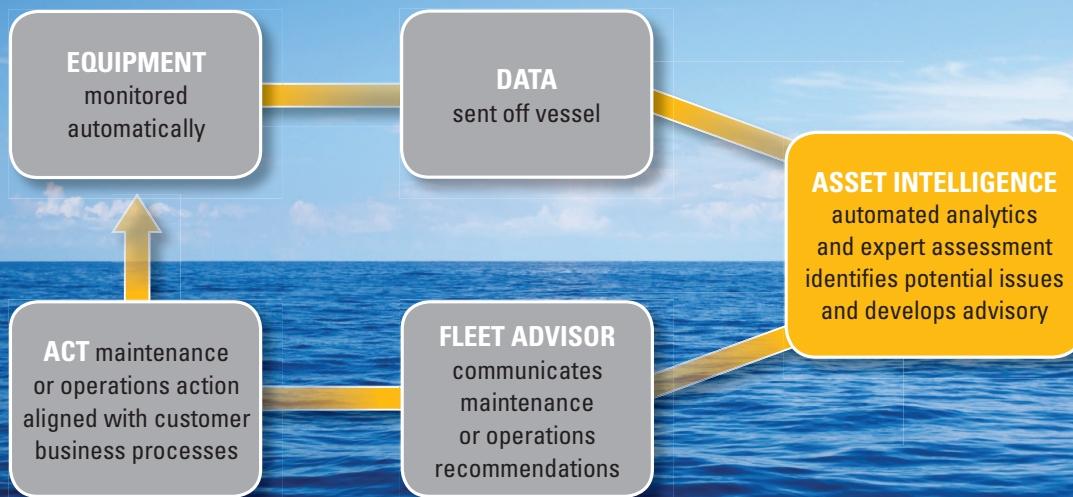

SUSTAINABILITY

The integrity you want.

Reduce environmental impact and simplify compliance.

Asset Intelligence in Action

Right information for your business

Our experts have decades of experience operating and maintaining marine equipment, from diesel engines to gas turbines. You get information based on your focus, your vessels, and your business goals. And Asset Intelligence has the technical flexibility to integrate with existing data sources and combine new sensors.

- Works with any equipment type or OEM
- Analytics provide real-time feedback to onboard crew and enable shore experts to provide timely, actionable advisories
- Clear advisory reports combined with flexible web-based user interface

Optimize equipment management

- Identify potential issues prior to failure
- Automated analytics with simple high level status and drill down capability

Increase productivity

- Evaluate equipment and vessel performance
- Focus maintenance to improve efficiency

Dashboards and metrics

- Drag-and-drop report and dashboard configuration
- Customize metrics for specific vessel type and business objectives

Whatever your information focus, from equipment management to productivity, safety, and sustainability, Asset Intelligence has your solution. And it's all covered by the worldwide Cat® dealer network, so service and support are never out of reach. We're built to put you in control.
