AND ALLOWS FOR EASY CLEANING.

FITS ON ERL STYLE RECTANGULAR MOUNTING
FLANGE FOR EASY RETROFIT.

WIPER BLADES ARE IN CONSTANT CONTACT
DUE TO NOVEL ROLLER GUIDE DESIGN.

ALL STAINLESS CONSTRUCTION.

1/2" THICK TEMPERED GLASS PREVENTS CRACKED
GLASS WHICH OCCUR WITH ERL STYLE
RECTANGULAR SIGHT GLASS.

The GUARD LEVEL® MAXIVIEW is a rugged heavy-duty cast stainless-steel sight glass that provides visual aid and full-depth gauging on coastal tank barges assuring safe loading and prevention of tank overfills. Unique features include the largest wiped surface area of any sight glass made in the industry and a raised- glass design for zero water accumulation. The sight glass is vapor-tight and can be fitted on tank hatch domes or expansion trunks providing unmatched visual precision in full-depth gauging on coastal tank barges.

Naturally, the MAXIVIEW complies with the Code of Federal Regulations for full depth manual tank gauging. When placed above the tank sumps, the sight glasses' visual gauging aids in a tank's stripping operation. Wiper elements of different types are available for petrochemical as well as chemical applications. 1/2"-thick tempered glass prevents cracked glass. The MAXIVIEW is a perfect bolt-on replacement for a competitors' style rectangular sight glass.
