

Why Insist on Genuine MaK Parts?

- Maximum Uptime at Minimum Cost**
- Prompt Availability of MaK REParts™
 - Low Owning and Operating Costs
 - Same-as-new Quality
 - Fraction of New Price
 - Good for the Environment
- Repair and Exchange Components**
- Piston Crowns
 - Cylinder Heads
 - Injection Pumps
 - Connecting Rods
 - Vibration Dampers
 - Turbochargers
 - Exhaust Cages
 - Cylinder Liners

The Power You Need.

The Cat® and MaK™ brands of Caterpillar Marine offer premier high- and medium-speed propulsion, auxiliary, and generator set solutions, as well as optional dual fuel, diesel-electric, and hybrid system configurations. With the launch of Caterpillar Propulsion our comprehensive and evolving product line gives customers one source for the most extensive engine power range available, complete propulsion systems, controllable pitch propellers, transverse and azimuth thrusters, and controls. Cat and MaK products and technologies are proven reliable and are built to last in all marine applications, demonstrating superior productivity and the lowest lifecycle cost.

The Cat Global Dealer Network, more than 2,200 global service locations strong, ensures that you will have local expertise, highly-trained technicians, rapid parts delivery, and the proper equipment and services to keep you working – anytime, anywhere.

Construction, term, or repower financing through Cat Financial helps you make Cat and MaK power a reality. With our knowledge of customer needs, local markets, and legal and regulatory requirements, we have been providing tailored financing solutions and exceeding expectations since 1986.

MaK REParts™

Genuine MaK Parts

Maximum Uptime at Minimum Cost.

Prompt and worldwide availability of quality parts is critical for your business success – often making all the difference in maintaining uptime and staying profitable. Many of our genuine MaK parts may often be rebuilt for a second life, adding value to your investment and reducing overall owning and perating costs.

Through our new MaK Repair and Exchange **Parts (REParts™)** program, we can offer our customers extensive repair and exchange options that provide same-as-new performance and reliability at a fraction of new price. The results are maximum engine productivity and lower life cycle costs – while reducing the impact on the environment.

A New Option for a Wide Range of Parts.

When your engine requires service, you need options that get your vessel back into operation quickly. Our extensive MaK REParts™ program provides you with sustainable, cost-effective and highquality service solutions through the optimal reuse of parts during an engine overhaul.

Same-As-New Performance.

We provide our customers with the most cost effective solutions available in the industry. MaK REParts™ are produced to the same quality standards as our original OEM parts.

By utilizing our state-of-the-art salvage and cleaning techniques, quality control, and stringent testing, MaK parts are returned to their original specifications. Only this attention to detail ensures MaK REParts™ provide same-as-new quality and reliability.

When you install MaK REParts™, you can be assured that the reliability and performance of your engine will be maintained. Equally important, all MaK REParts™ are backed by our parts warranty.

Ready to Use, Easy to Exchange –
Wherever You Are.

MaK REParts™ are ready to use, easy to exchange and install, so you can minimize downtime and increase your vessel availability. Our broad line of MaK REParts™ is supported by our worldwide approved dealer and distribution network, and can be ordered through your local MaK representative.

Return, Repair, Or Replace.

MaK REParts™ provide you with an option to lower owning and operating costs by reusing many of the original components. With the return of your used genuine components, you can save 20–40% of the repair or replacement costs. We visually inspect the used components, providing an immediate decision on core condition and cost, so you can better estimate repair costs.

The return criteria* and process is simple. The component should be in fair and usable condition, no visible cracks, damage or welded repairs. It should be fully assembled and complete, with no excessive rust or corrosion on interior or machined surfaces. And, you decide whether to repair or exchange your MaK components.

A Sustainable Solution.

MaK REParts™ make a positive contribution to sustainability by keeping non-renewable resources in circulation for multiple lifetimes. By returning used components to same-as-new condition, we reduce waste and minimize the need for raw material to produce new parts.

As you would expect, MaK REParts™ conform to all EIAPP and IMO requirements (as applicable) and meet all current and future emission-relevant regulations.

Repaired to OEM specifications.

* Core refund criteria vary by component and are subject to change. Partial core refunds are available for some MaK Marine Engine components. Contact your MaK dealer for a detailed offer.
