January 2017

As the Cruise Industry continues to grow, Metric Marine is uniquely positioned to grow with the needs of the Cruise Lines.

Metric Marine and Industrial was founded in 1988 and is still owned and operated by Frank A. Bourne and Claus Espe. Both Frank and Claus were educated in maritime fields and have decades of experience in the Marine Industry and Marine Supply.

Frank began his career in the Maritime Industry as a graduate of the United States Merchant Marine Academy and Claus began training in Maritime Apprenticeship with large ship suppliers in Copenhagen, Denmark.

From a small warehouse in San Rafael, California, Metric Marine began servicing the maritime industry in a wide variety of markets – from the Alaska fishing fleet, the Gulf Oil Rigs, and the ship chandlers from coast to coast. With the increasing popularity of the cruise industry and the prevalence of European ships operating in North America, Metric Marine continued to develop a diverse inventory of specialty maritime products with competitive pricing.

Metric Marine has earned a place as a leader in the cruise industry through decades of hard work, innovation, and dedication. Along with our extensive and growing inventory and competitive pricing, we have earned our excellent reputation for providing the Cruise Lines with outstanding customer service and accountability.

We stand by the values that have made our company successful and look forward to providing our customers with top notch service for years to come.

- The Team at Metric Marine
