WELCOME

Dräger is a leading international company in the fields of medical and safety technology. Founded in Lübeck in 1889, Dräger has grown into a worldwide enterprise in its fifth generation as a family-run business. Our long-term success is predicated on a value-oriented corporate culture with four central strengths: close collaboration with our customers, the expertise of our employees, continuous innovation and outstanding quality.

"Technology for Life" is our guiding principle. Wherever they are deployed – in clinical settings, industry, mining or emergency services – Dräger products protect, support and save lives.

RESPIRATORY PRODUCTS FROM DRÄGER

PROFESSIONAL RESPIRATORY PROTECTION SINCE 1889

Regardless of your industrial application, whether it be painting, welding, carpentry, metal processing or chemical handling, your safety is Dräger's prime objective. Even under the harshest conditions, with Dräger you will find a system solution that meets your needs.

For more than 100 years Dräger products have helped keep people breathing safely. The Dräger X-plore® range of respiratory protection products offers a complete selection of products and system solutions—tailored to meet your needs.

The ideal combination of comfort, easy handling and user safety is ensured by new materials, a modern and practical design, together with the experience of numerous engineers' world-wide and intensive dialogue with our customers.

This all adds up to offering solutions which meet your expectations.

DRÄGER VOICE

WE HAVE SOMETHING AGAINST DANGER AT THE WORKING PLACE

When something is in the air – regardless of dusts, gases or vapors – the use of high-quality respiratory protection is essential.

When it comes to selecting the right respiratory protection there are some important factors to consider: knowledge of the existing contaminants and the application requirements along with the limitations of use and the protection levels each respirator offers. Sound complicated? You are not alone, but Dräger has the right tools to support you and will help you every step of the way.

Our Dräger VOICE database of hazardous substances supports you in selecting the optimal mask-filter combination for your application. You can find it in the internet under www.draeger.com/voice.

For a quick and easy orientation the following pages give you a short overview on the Dräger X-plore® product family, selected industrial applications, and the appropriate respiratory protection for your job.

AIR PURIFYING RESPIRATORS

SELECTING THE APPROPRIATE RESPIRATORY PROTECTION

Selecting the appropriate mask/cartridge/filter combination is extremely important to ensure that you are properly protected throughout the work day. The information contained in this brochure should only be used as guidelines and should not be used as a substitute for local/federal regulations or worksite specific conditions.

Additional information can be found in the product instruction manual or on your regulating agency's (e.g. OSHA, NIOSH) website.

Do not use an Air Purifying Respirator under the following conditions:

- In atmospheres containing less than 19.5% oxygen
- If type of contaminant or concentration is unknown
- In an IDLH (Immediately Dangerous to Life or Health) atmosphere
- If concentration is unknown, assume IDLH

If any of these conditions exist, you must use an appropriate supplied air respirator.

Basic information needed for selection:

- Know what type of hazards are present
- Concentration levels
- Assigned Protection Factor (APF): expected level of protection from a particular class of respirators – OSHA 1910.134

These items can be determined using one of Dräger's gas detection instruments from our comprehensive line, MSDS, product label, etc.

Once this information is known, an excellent resource to determine respirator type is to refer to the NIOSH Pocket Guide to Chemical Hazards (www.cdc.gov/niosh/npg). This guide lists the Permissible Exposure Limits (above this level respiratory protection is required), type of respiratory protection required, IDLH level, if eye irritant, if carcinogen, special instructions, etc.

AIR PURIFYING RESPIRATORS

Mask Selection

Select mask type based on its Maximum Use Concentration ($MUC = APF \times PEL$), of course not exceeding the IDLH level, and determine if eye protection is necessary. In addition, check NIOSH Pocket Guide for substance specific guidelines.

Filter/Cartridge Selection

First check the NIOSH Pocket Guide and follow any special instructions for the substance of concern.

- Filters – should be selected only when particles (solid or liquid) are present. If oil is present, then use an “R” or “P” version. N95 offers the minimum approved protection; P100 provides the maximum approved protection.
- Single Gas Cartridges – should be selected only when gases or vapors from one particular family are present.
- Multi-Gas Cartridges – should be selected when gases or vapors from more than one family are present, or to reduce logistics when one cartridge is preferred in different areas containing different substances. Typically, multi-gas cartridges will last half as long as single gas cartridges.
- Combination Cartridges – should be selected when gases/vapors and particulates are present.

AIR PURIFYING RESPIRATORS

Dräger X-plore® 8000 headpieces

Hoods, helmets, visors and masks

The more comfortable you are, the better you can do your job. The innovative Dräger X-plore® 8000 headpieces are an integral part of our new powered air-purifying respirator (PAPR). Both the loose and tight-fitting series offer robust, effective protection along with a high degree of comfort.

Low-noise material

Standard and premium hoods are made of soft and comfortable low-noise material

Low distortion

Spacer on top of the visor gives the visor a defined curvature to reduce distortion

High protection level

All hoods approved as TH3

Secure fit

Comfortable fit even when you are moving, due to ergonomic design

Guided air inlet

Wind deflector inside the hose connector leads the air away from your head to eliminate feeling cold at a single spot

Perfect fit

All hoods available in two different sizes

BREATHE EASY – INDEPENDENT OF THE AIR AROUND YOU.

Combining comfort with exceptional performance, it is designed for applications where simplicity and ease-of-use are essential. Lightweight yet robust, and easy to wear, this advanced breathing apparatus provides the ultimate breathing protection.

These products supply the wearer with breathable air from a compressed air vessel or through a pneumatic system connected with hoses. When selecting SCBAs, it's important to consider that you need as much protection as necessary with as little weight as possible – so you can get the job done without hindrance.

SELF CONTAINED BREATHING APPARATUS

Dräger PSS® 5000

NFPA-Certified SCBA

Effective firefighting requires trusted breathing protection in the harshest environments. The Dräger PSS® 5000 provides the budget-conscious fire department with an ergonomically advanced SCBA. With a wide range of features—such as bi-lateral hose routing and cylinder Quick Connection—the PSS® 5000 meets the needs for today's complex fire grounds.

Tough Materials

Comprised of flame-resistant, abrasion resistant, and water-resistant materials

Pivoting lumbar support waist belt

Allows free movement while holding the SCBA firmly in position

Quick Connect cylinder attachment

Enables a secure change of cylinders in less than 10 seconds

Sentinel 7000 digital monitor with integrated personal alert safety system (PASS)

Communicates wirelessly with HUD

Optional Buddy Breather

Keeps an emergency breathing supply system within easy reach

SELF CONTAINED BREATHING APPARATUS

Dräger Secor 7000

Diving Regulator

The Dräger Secor 7000 regulator, consisting of a first and second stage, was developed for professional divers. To ensure comfortable diving, the hose can be connected to the second stage either from the left or right side. Secor 7000 is compatible with the full face mask Panorama Nova Dive. The pneumatic system can be individually configured using different outlets on the first stage.

First stage

- diaphragm-controlled
- supply-pressure-compensated
- no decline in airflow

Individual configuration

- Three high-pressure (HP) ports and five medium-pressure (MP) ports to connect as needed
- High flexibility in configuring the pneumatics

D-103892-2016

Service pressure
of 3000 psi (yoke)
or 4500 psi (DIN)

D-10378-2016

Second stage

- downstream, balanced, with integrated pressure-relief valve
- hose connection on both sides
 - fits perfectly with the Dräger Panorama Nova Dive

EMERGENCY ESCAPE BREATHING APPARATUS

Dräger Saver CF N (NIOSH) 73

EMERGENCY ESCAPE BREATHING APPARATUS

BREATHE EASY – INDEPENDENT OF THE AIR AROUND YOU.

In emergency situations, conditions can deteriorate rapidly. Ambient breathing air can be suddenly filled with smoke or toxic fumes and rapid escape is the only available option. The Dräger's Emergency Escape Breathing Apparatus allows safe, effective and uncomplicated escape from hazardous environments.

Respiratory protection even in the most extreme conditions Dräger filtering and constant flow devices are easily ready for use in a few simple steps. Immediately after donning, workers can escape the danger zone, reliably.

ADVANTAGES :

- A wide range of emergency escape breathing apparatus': from the easy-to-use filter, particularly compact, to the insulators associated with a hood or mask to innovative oxygen generation with a range of up to 15 minutes
- Easy and fast implementation even for untrained people
- Compact and robust packaging / case
- Numerous versions: with or without hood, different durations of protection, training units available
- Economical: up to 10 years of maintenance-free use
- Our technical sales representatives advise you on the most suitable solution
- Maintenance and service by our DrägerService Service Center.

EMERGENCY ESCAPE BREATHING APPARATUS

Dräger PARAT® Escape Hoods

Airborne toxins present an immediate danger to the health of a workforce. When environments turn toxic, a fast, safe escape is crucial. Dräger PARAT® Escape Hoods are designed to be easily donned, protecting users from toxic industrial and fire-related gases, vapors, and particles during escape.

PORTABLE GAS DETECTION

SAFETY TO GO.

Many hazards in the workplace cannot be detected by human senses: some toxic gases, oxygen deficiency, some combustible gases and vapors. These hazards pose a serious threat to human life and plant safety in many industries. When it comes to the reliable detection of known and unknown gases, you can rely on portable gas detection technology from Dräger. Our extensive product range offers you the perfect solution for every application.

Profit from our experience.

The development of our Dräger-Tubes® more than seventy years ago laid the cornerstone for accurate gas detection. Today, thanks to continuous research and development, we now offer more than 250 Dräger-Tubes® able to detect over 500 substances. Combined with the Dräger chip measuring system, an electronic form of the tube, Dräger provides you with some of the most accurate and reliable means available for spot concentration measurement.

We take your protection personally.

Personal gas detection instruments are essential for providing workers with a reliable form of protection. Our sophisticated single-gas detectors are recommended for ensuring workplace safety when you need to be alerted to the presence of harmful gas concentrations.

Dräger multi-gas detectors offer a wide range of options, making them flexible companions in a variety of situations such as personal protection, area monitoring, and leak detection. Special accessories make it easier to work in places that are difficult to access, such as tanks or shafts, while ensuring that safe clearance is possible.

We continuously invest in sensor technology to ensure greater safety at work. Our sensor systems, including catalytic, infrared, electrochemical and photoionization detectors (PID), set standards in terms of sensitivity and longevity. Providing the world's largest number of electrochemical sensors to measure the widest variety of gases means that a perfect solution is available for each measurement task. Testing and calibration stations, portable printers, and complete workshop solutions ensure that your Dräger gas detection instruments are well maintained and ready for use at a moment's notice.

PORTABLE GAS DETECTION

Dräger X-am® 2500

Multi-Gas Detector

Dräger's X-am® 2500 accurately detects combustible gases, O₂, CO, NO₂, SO₂ and H₂S and is the only 1-4 gas monitor you need in industrial and refinery applications. The X-am® 2500 combines reliable sensor technology with long battery life and intuitive operation in an instrument that defines safety. It is approved for most markets including mining, oil & gas, chemical, fire and hazardous response, government and many other applications.

PORTABLE GAS DETECTION

Dräger X-am® 3500

Multi-Gas Detector

The Dräger X-am® 3500 was especially designed for clearance measurements and personnel monitoring applications. The 1 to 4 gas detector reliably detects flammable gases and vapors as well as O₂, CO, H₂S, NO₂ and SO₂. The innovative signaling design and extensive range of accessories ensure optimum safety and easy handling.

Switch easily between pump and diffusion mode

Slots for DrägerSensors® to measure up to four gases

Glowing green D-light indicates that the unit is tested and ready for use

Easy-to-read color display with zoom function

PORTABLE GAS DETECTION

Dräger X-am® 8000

Multi-Gas Detector

Clearance measurement was never this easy and convenient: The Dräger X-am® 8000 measures up to seven gases, including toxic, flammable gases and vapors, and oxygen all at once—either in pump or diffusion mode. Innovative signaling design and handy wizard functions ensure complete safety throughout the process.

Switch easily between pump and diffusion mode

Impact detection informs you of severe mechanical stresses

Intuitive smart assistants for clearance measurement, leak detection, and benzene-specific testing with the PID (pre-tube)

Glowing green D-light indicates that the unit is tested and ready for use

Five slots for DrägerSensors® to measure up to seven gases, two new high-performance PID sensors

Easy-to-read color display with zoom function

PORTABLE GAS DETECTION

Dräger X-pid® 9500

Multi-Gas Detector

The selective PID gas measurement device is ideal for users who frequently test for hazardous toxic substances. Benzene, butadiene and other volatile organic compounds (VOCs) are carcinogenic even in the smallest concentrations. Selective measurement is necessary because other gases and vapors are often also present. The Dräger X-pid® 9500 allows for short test times and laboratory-quality results.

Dräger X-zone® 5500

Area Monitoring

Dräger's X-zone® 5500 brings a safer, more effective way to monitor hazardous gases--reinventing area monitoring. In combination with the Dräger X-am® 5000, 5100, or 5600 gas detection instruments, the X-zone® 5500 can be used for the measurement of up to six gases and extends the range of your portable gas detection technology exponentially.

PORTABLE GAS DETECTION

Dräger Pac® 6000

Single-Gas Detector

The Dräger Pac® 6000 disposable personal gas detector measures CO, H₂S, SO₂ or O₂ reliably and precisely, even in the toughest conditions. The robust design, quick sensor response times, and a powerful battery ensure maximum safety for up to two years with virtually no maintenance required.

Easy fastening with tightly closing crocodile clip

Illuminating D-Light shows detector is tested and ready

Robust housing with handy design for tough conditions

Clear color coding prevents mistakes

Easily replaceable filter membrane protects the sensor

Large display shows important information

360° alarm signal can be easily seen from all sides

PORTABLE GAS DETECTION

Dräger Pac® 8000

Single-Gas Detector

With the robust Dräger Pac® 8000, you'll be well equipped for tough conditions: this non-disposable, personal single-gas detection device is a reliable and precise instrument, which detects hazardous concentrations of twenty nine different gases, including special gases like NO₂, O₃ or COCl₂.

 **Bluetooth™**
Option Available

Easy fastening with tightly closing crocodile clip

Illuminating D-Light shows detector is tested and ready

Robust housing with handy design for tough conditions

Clear color coding prevents mistakes

Easily replaceable filter membrane protects the sensor

Large display shows important information

360° alarm signal can be easily seen from all sides

Dräger Pac® 8500

Single-Sensor Detector

The Dräger Pac® 8500 single-sensor detection device is a reliable and precise instrument even under the toughest of conditions. The detector can be equipped with a hydrogen-compensated CO sensor or a Dräger dual sensor. The dual sensors provide the option of measuring two gases at once: H₂S with CO, O₂ with CO, or H₂S with O₂.

Run time	14 hours on full charge
Communication Range	Cellular/Internet – unlimited Wi-Fi, 2.4 GHz – approximately 300 feet outdoors
Case dimensions	21 in x 15.5 in x 7.3 in (534 mm x 394 mm x 186 mm)
Total Kit Weight	22 lbs (10.0 Kg)
Mirion AccuRad™ Specification	
Weight	Version 1: 7 oz (200 g), including clip Version 2: 17" x 13" x 8" (43.18 x 33.02 x 20.32 cm) without antennas
Size	Version 1: 4.25 x 2.4 x 1.4 in. (108 x 61 x 36 mm) without clip Version 2: 12.8 lbs (5.81 kg)
Batteries	Two AA batteries for more than 900 hours of continuous operation Tool-less battery cover
IP Rating	Approx. 600 minutes of testing time
Temperature	5 x 1.5 v AA alkaline batteries
Drop	1.5 m (4 ft 11 in.) on concrete Innovative heavy-duty bi-material construction Replaceable fiber-reinforced clip
Modes of Operation	Dose or count rate Search with trend or radar 0–9 display indicator
Display	Top display enables hands-free visual alarm assessment
Languages	English, Spanish
Buttons and Navigation	Intuitive to use even without training Comfortable for one-handed operation
Alarming	Vibration Visual LED Audible sound: 85 dB(A) at 30 cm (11.8 in.)
Detectors	CsI(Tl) scintillation detector with temperature compensated SiPM for interdiction missions Silicon diode for integrated dose and high dose rate to ensure proper health and safety
Detection Performance	Alarms at 50 μ rem/h (0.5 μ Sv/h) within two seconds VBS: Authenticates true alarms in variable backgrounds Energy range: 25 keV to 3 MeV; detects all radionuclides of concern

SAFETY TO GO.

Many hazards in the workplace cannot be detected by human senses: some toxic gases, oxygen deficiency, some combustible gases and vapors. These hazards pose a serious threat to human life and plant safety in many industries. When it comes to the reliable detection of known and unknown gases, you can rely on portable gas detection technology from Dräger. Our extensive product range offers you the perfect solution for every application.

The development of our Dräger-Tubes® more than eighty years ago laid the cornerstone for accurate gas detection. Today, thanks to continuous research and development, we now offer more than 250 Dräger-Tubes® able to detect over 500 substances. Combined with the Dräger X-act® 7000 system, an electronic form of the tube, Dräger provides you with some of the most accurate and reliable means available for spot concentration measurements in the parts per billion range.

Dräger Tubes Measurement-System Dräger-Tubes®.

Each order number refers to one box of tubes. Usually one box contains ten tubes. In other cases the number in brackets behind the name of the tube indicates the measurements per box. For the Dräger-tubes the standard measuring range is mentioned. For a possible measuring range extension, please have a look into the instruction for use. The indicated measurement time relates regarding the Tubes for short term measurements to the stated numbers of strokes for the particular tube. If the measurement time is less than 1 Minute, it will be stated with the abbreviation "s" in seconds.

DRÄGER-TUBES® AND MICROTUBES

Dräger-Tubes® Measurement System

Short-Term Dräger-Tubes®

Dräger-Tubes® are an easy to use and cost effective way to measure toxic gases and vapors in the workplace. More than 200 different Dräger-Tubes® are available to accurately make spot measurements for over 500 gases and vapors.

DISCLAIMER

Dräger-Tubes are used in conjunction with either a manual or automatic sampling pump using individual Dräger-Tubes or special 5 tube sets for simultaneous measurement. Dräger Pumps and short-term Dräger-Tubes® are not interchangeable with other manufacturers' pumps and detector tubes.

Space is provided in the kit for 6 additional boxes of standard Dräger-Tubes®. Dräger provides over 250 different chemical specific short term tubes for detection of over 1,000 chemicals.

Test Set Information

Simultaneous Test Set I Detects acid gases (e.g. hydrochloric acid, nitric acid), hydrocyanic acid, carbon monoxide, basic type gases (e.g. ammonia, butylamine) and nitrous gases (NO & NO ₂)	8101735
Simultaneous Test Set II Detects sulfur dioxide, chlorine, hydrogen sulfide, carbon dioxide and phosgene.	8101736
Simultaneous Test Set III Detects organics: ketones (e.g. acetone, MEK), aromatics (e.g. benzene, toluene), alcohols (e.g. methanol, ethanol), aliphatic hydrocarbons (e.g. n-hexane, n-octane) and chlorinated hydrocarbons (e.g. perchloroethylene, trichloroethylene)	8101770

Dräger Civil Defense Simultest (CDS)

The Dräger CDS Kit uses specialized Dräger simultaneous tube sets to quickly and reliably detect the presence of nerve, blister, blood and choking agents.

Dräger Flow Check

Air Flow Indicator

The Dräger Flow Check air current indicator produces a harmless cloud of smoke that floats freely and easily, because it has the same density as ambient air. Consequently, slight air currents become visible to easily identify leaks and test the integrity of air-tight systems.

Dräger X-act® 7000

Multi-Gas Detector

The innovative Dräger X-act® 7000 analysis system consists of Dräger MicroTubes and an opto-electronic analysis device that lets you precisely measure gases in the low ppb range. It gives you precise results right on site, replacing slow, expensive lab analyses. It's extremely easy to use: insert the Dräger MicroTubes, start measuring, then read out the test result.

2.4 inch, high contrast colour display
160° viewing angle and day/night reading mode

3-button control
For fast and easy operation

LED status indicator
Green LED glows when test is complete

Dräger MicroTubes

DRÄGER - YOUR RIGHT PARTNER

PROTECTION THAT GOES BEYOND YOUR MASK

Dräger is synonymous with professional respiratory protection world-wide. We not only offer a complete range of compatible air purifying respiratory protection products but are your partner when it comes to questions regarding occupational safety and health.

Dräger is always the right partner – not only when it comes to masks, filters, compressed airline systems, selfcontained breathing apparatuses and escape devices, but also a world-wide sales and service network – Dräger is able to offer you the most extensive support available.

This includes support in service, maintenance, repair and cleaning of the Dräger products as well as the speedy supply of spare parts – no matter where you are. In addition, the Dräger Safety Academy offers an extensive training program. Competent advice for the correct use of filters or for the selection of a suitable respiratory protection is certainly also part of our comprehensive service portfolio.

Our high demands on quality and service as well as the alignment with the needs of our customers result in durable products for your daily working routine. Pursuant to this our long-term product concepts guarantee reliable fulfilment of demands and spare parts supply in the future.

All this makes Dräger a reliable partner of the industry in every respect. On your request we develop comprehensive safety concepts and solutions far beyond the individual products. This can also include financing solutions, as leasing and financing are a part of our service portfolio. This is a part of our integral service concept.

TERMS AND CONDITIONS

1. Scope of Application, General

- 1.1 Any delivery of goods and provision of services (hereinafter collectively "Goods") by Dräger* to the Customer, with the exception of construction works shall be subject to these General Terms and Conditions ("GTC") set forth herein. These GTC form a constituent part of all offers, orders and agreements between Dräger and the Customer.
- 1.2 Deviating terms and conditions - unless agreed to in writing - do not apply. Dräger and the Customer may agree to terms and conditions deviating from these GTC, such terms shall then have priority over these GTC. These GTC apply even if Dräger provides the Goods with knowledge but without actual acceptance of deviating terms and conditions of the Customer.
- 1.3 Dräger provides construction works in accordance with the German Standard Building Contract Terms, Part B (Verdingungsordnung für Bauleistungen, Teil B - "VOB/B"). The VOB/B shall be supplemented in a subordinate manner by Sections 2.2, 3, 4, 6 and 11 to 13 of these GTC.

2. Scope of Performance

- 2.1 Offers by Dräger shall always be non-binding. Orders shall be deemed accepted only if Dräger confirms same or carries out the order.
- 2.2 The offer by Dräger shall govern the scope of performance. Statements as to weight and measurements in brochures and offers are according to best knowledge but are not guaranteed properties (Beschaffenheitsgarantie). The right to reasonable performance and construction modifications is reserved. The functions of software shall be limited to the description in the performance specifications. To the extent reasonably acceptable to the Customer Dräger may use components that are as good as new or that have been rendered as good as new.

- 2.3 Technical norms serve as performance specification only, provided Dräger does not expressly provide a guarantee in the form of a full guarantee for compliance with such technical norm. Guarantees as to properties (Beschaffenheitsgarantie) or shelf life (Haltbarkeitsgarantie) must be in writing.
- 2.4 Dräger shall retain, without limitation, any and all ownership rights, copyrights and industrial property rights in drawings, technical documents and other data, information and documentation in material or immaterial form, including in electronic form; these may not be disclosed to third parties without written consent.
- 2.5 In case of resale of Goods the Customer is responsible to comply with all applicable export rules and regulations. The Customer shall defend and indemnify Dräger from all costs and claims based on the violation of export rules and regulations by the Customer."
