Container Securing with System

In the container industry, cycle time for loading and unloading containers is the most important criterion. Innovative container securing systems designed by German Lashing aim specifically at enhancing productivity and safety, both on the vessel and at container terminals.

Commitment

Based on great tradition, German Lashing Robert Böck GmbH is a German-owned company with headquarters in Germany, China and a global network of trained agents. More than three decades of experience in the manufacture and supply of container stowage and lashing systems have turned German Lashing into a leading mark of excellence, which is recognised and preferred worldwide.

German Lashing designs, manufactures, sells and services complete solutions for the container handling industry, globally accepted and certified by all classification societies. As a leader and specialist in

container securing technology, a dedicated and highly experienced staff is constantly endeavouring to optimise container stowage and lashing systems, to provide highest levels of customer service, workmanship and product reliability. German Lashing has customers around the world including shipyards, ship owners, ship managers and consultants.

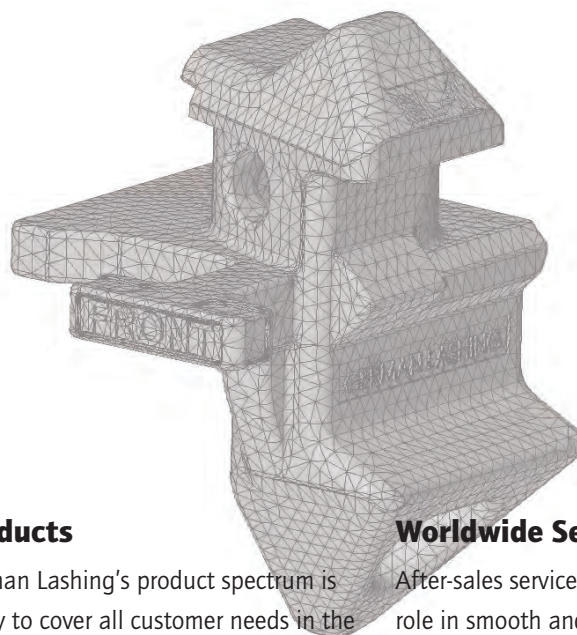

Design and Engineering

German Lashing constantly continues its programme of product and service development, focusing on the aim to supply the highest quality products to suit the customer's requirements and their expectations of value, performance and quality. Fully-equipped research and testing facilities provide German Lashing with an R&D capability to develop and improve products and processes.

Quality

Esteemed for its reputation for excellent quality, German Lashing's own production centre is certified to ISO 9001 and by all major international classification societies. Accompanied by established Quality Management procedures, the products are tested by equipment that has proved its worth in efficient and safe operation, and is engineered to an exact unvarying world-class standard.

Products

German Lashing's product spectrum is ready to cover all customer needs in the field of container securing systems. The certified own production centre and a highly skilled team ensure the unrivalled quality level, covering specification, design, manufacturing and forwarding to the final destination at the customer. In addition to standard systems, German Lashing can offer expert solutions for individual customer applications.

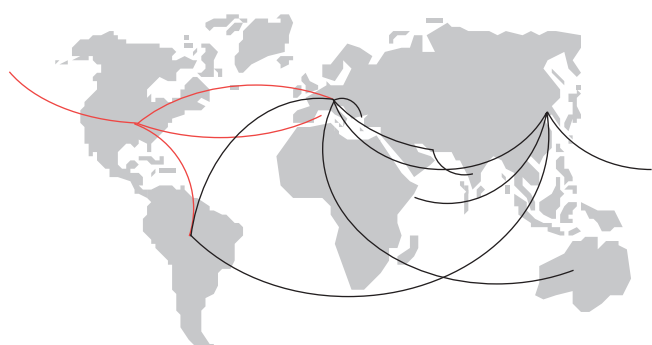

Worldwide Service

After-sales service plays a leading role in smooth and trouble-free container operation. German Lashing is firmly committed to providing a full and comprehensive product support service to its customers wherever they are in the world. The company guarantees excellent service for its clients through the worldwide delivery of products and services from the service centre network. The German Lashing range is backed up with well-trimmed service packages and training programmes.
