Gas Detector Services

We provide professional services for gas detectors and UTI's

Gas Detectors measure contents of oxygen, flammable gases or vapors, carbon monoxide and hydrogen sulfide, in order to ensure your safety by entering into enclosed spaces.

According to latest IMO and SOLAS regulations, atmospheric testing devices are mandatory for the specific use in enclosed spaces.

As an official service partner of Riken Keiki/RKI we are able to provide a full range of service for Gas Detectors.

Should you require a general calibration, repair or new supply, we are able to assist.

Furthermore, we provide UTI calibration and repair services.

When you contact us, you'll get solutions and answers to your gas detection needs. Our service technicians are experienced professionals in the gas detection industry and are available to assist in providing services on several brands such as RKI, MSA, Honeywell, Dräger, Scott etc.
