Load Test

We provide extensive load testing services

Using certified water bags and load cells, we are capable to execute load tests on:

- Cranes/lifting appliances
- Davits
- Lifeboats
- Gangway and accommodation ladders

Due to our extensive experience with

Life-Saving Appliances, load testing of lifeboats and davits is part of our core business. As a result of this knowledge, we are able to perform load testing on all types of lifting appliances up to 800 t.

The required test load is accurately applied with our state of the art flow meters and remote control load cells to ensure compliance with applicable regulations.

Load testing with our certified water bags keeps the required time to a minimum and ensures highest efficiency.

Throughout our extensive service network in North America, our team of professional service engineers is ready to fulfill your requirements at any time.
