

SHT Deck Pressure Gauge

SHT Deck Pressure Gauge is a rugged high precision gauge provides reliable reading within the range of -10kPa vacuum and 30kPa pressure. 1" quick connection coupling or others barrel.

PRODUCT SPECIFICATION

- Pressure gauge diameter: 100mm
- Pressure reading -10kPa to 30kPa
- Case: Stainless Steel
- Gauge Connection: Copper Alloy
- Barrel: Stainless Steel
- Window: Laminated safety glass
- Accuracy class: 1.6
- Ingress protection: IP54
- With rubber protection from shocks and impacts
- 1" quick connection or others barrel
- Weight, 1.5kg

CAUTION

This portable gas pressure meter is developed to measure pressure of Inert-Gas filled in tank simply on deck of each tank locally. However, as the meter is very low indication mechanical and delicate pressure type, careful handling is required. Also the meter is not constructed for water-tightness and durability to fit on deck permanently. It is recommended to remove it from tank gauging station and store to ship's cabin after use.
