

Industrial Technologies S.A. was established in 1982.

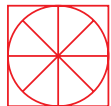

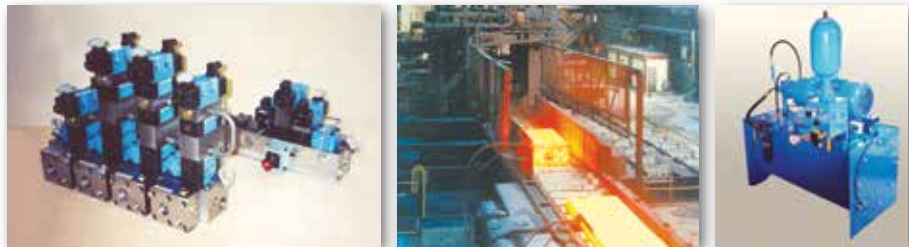

Our main focus is in design, assembly and marketing of hydraulic systems for marine, industrial and mobile applications.

The company is manned with competent employees having a nearly 40-year experience of field work in hydraulics.

This experience and know how is passed on to our customers not only with day to day business but through our training seminars as well. We have also issued a training manual on industrial hydraulics which is available from selected bookstores.

Our workshop and test stand enables us to build custom made power packs of every required size, from simple to highly sophisticated circuits.

We work through a well supplied warehouse located in the outskirts of the industrial district of Athens. Our inventory has been carefully designed to provide rapid and responsible service to customers, covering most repair and aftermarket requirements.

Industrial Technologies S.A.

Industrial Technologies S.A.

**Complete line of hydraulic systems and spare parts
for marine, industrial and mobile applications**

EAT•N

Vickers

KPM
Kawasaki Precision Machinery

Staffa

EATON | Vickers

Complete series of Vane Pumps, Cartridge Kits, Piston Pumps, Directional Valves, Proportional Valves, Hydrokraft Pumps, Cartridge Valves

Kawasaki Piston Pumps and Motors for mobile and Industrial machinery, K3V, M3X, K3VL, K3VG and their Spares

VOITH TURBO POWER TRANSMISSION

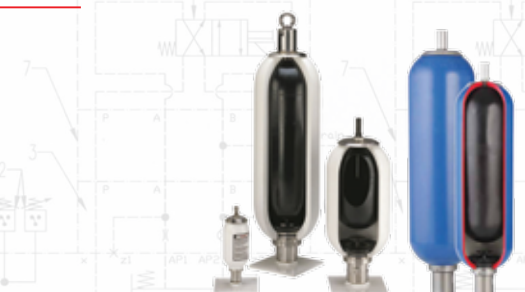

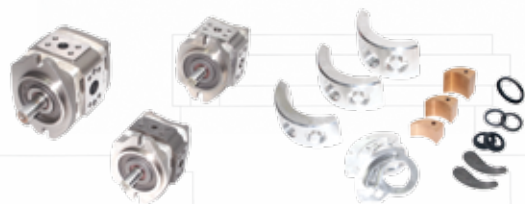

High Pressure, Low Noise Internal Gear Pumps series IPH - IPV - IPC and complete line of Spare Parts

Hydraulic Accumulators and Spare Parts

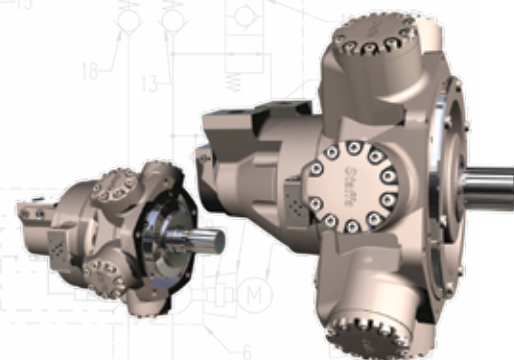

Oil - Water/Air Heat Exchangers

Staffa Kawasaki

We are official distributors for Kawasaki Precision Machinery (UK) Ltd. the maker of Staffa Hydraulic Motors. One of our fields of activity is hydraulic systems for marine applications (mooring/anchor winches, windlasses, hatch covers, cargo cranes). Our personnel carry 40 years of experience and technical know-how in selling, repairing and servicing Staffa Motors. We hold a stock of original and brand new Staffa Motors in our Athens warehouse and we can arrange to ship them worldwide, in the manufacturer's packaging, directly to the vessel. We can also supply original spare parts (pistons, connecting rods, bearings, seal kits, seal rings, shaft seals, distributor valves etc.) We have a workshop and repair facility where we can inspect and overhaul

motors of all sizes. Some of the largest and most respectable shipmanagement companies and shipowners have repeatedly shown their trust and loyalty to our services.
