

The only Calibration Gas supplier offering **FREE** worldwide delivery

The Reality of Sourcing Calibration Gas.

For too long, sourcing calibration gas has been a cause of frustration for shipowners and managers. As calibration gases are considered 'dangerous goods', slow, unreliable, and expensive deliveries have become the accepted norm. But why should they be?

Does this sound familiar?

Endless Delays: Chasing quotes from multiple suppliers, only to have deliveries miss your vessel's tight schedule at port.

Hidden Costs: Paying unexpected fees for customs clearance, agent handling, and hazardous cargo paperwork that seems to appear out of nowhere.

Supply Headaches: Struggling to find the specific gas mixtures you need locally, forcing you to compromise on quality or pay a premium for international supply.

Wasted Time: Spending valuable hours managing multiple suppliers, invoices, and delivery updates instead of focusing on what matters – running your fleet efficiently.

**It doesn't have to be this way.
It's time for a change.**

THE NEW STANDARD IN GAS SUPPLY:

FREE WORLDWIDE DELIVERY

We listened to the industry's biggest frustration and decided to solve it for good.

We are proud to be the first and only international calibration gas supplier to eliminate the cost of delivery for qualifying orders.

This isn't a temporary promotion; it's a new standard of service. We have fundamentally re-engineered our global logistics network to make your procurement process more straightforward, transparent, and cost-effective than ever before.

With FastCalGas, you get:

No Hidden Costs, No More Invoice Shock: Say goodbye to surprise shipping fees, hazardous cargo surcharges, and fluctuating fuel costs. The price you are quoted is the final price you pay, allowing for complete budget certainty.

Genuine Global Reach: Whether your vessel is in Singapore, Rotterdam, Houston, or Piraeus, our extensive network of global hubs ensures your gas arrives where it needs to be, when it needs to be there. We can make this promise thanks to our major stockholding hubs in the UK, USA, and Singapore.

Radically Simplified Budgeting: Free your procurement team from the time-consuming task of sourcing shipping quotes and approving complex freight invoices. By eliminating the most volatile variable in your supply chain, your budgeting becomes simpler, more transparent, and more predictable.

Terms and conditions apply. See website for details.

THE ULTIMATE SOLUTION: THE FASTCALGAS 1-2-1 SERVICE

Free delivery is a game-changer. But what if you could eliminate the hassle of ordering gas altogether for up to two years as well?

Welcome to the **FastCalGas 1-2-1 Service** – the most innovative, most efficient way to manage your fleet's calibration gas requirements. It's a fully managed, consultative service designed to save you time, money, and administrative headaches. The principle is simple:

1 Order. 2-Year Supply. 1 Invoice.

By purchasing your entire two-year supply upfront, you convert a volatile operational expense into a single, fixed, and predictable cost for that period. This is made possible by our industry-leading 2+ year shelf lives*. Combine this with the expert knowledge of our team, and we can accurately calculate and supply your vessel with everything it needs for two whole years in a single, consolidated delivery. You place one order, receive one invoice, and you're done. A consolidated 2-year supply is also the easiest way to meet the requirements for our Free Worldwide Delivery offer, maximising your savings from day one.

Getting Started Couldn't Be Easier.

Our gas experts have over 30 years of combined experience and know the requirements of every gas detection system on the market. All we need from you are the answers to four simple questions about your vessel's equipment.

OUR SIMPLE 4-STEP PROCESS:

1

Tell Us Your Systems

Let us know the make and model of the gas detection systems on board by answering 4 simple questions.

2

We Calculate Your Needs

Our experts calculate the exact gas volume your vessel will consume over 2 years.

3

Receive Your Quote

We provide a single, all-inclusive quote for a 2-year supply, and confirm if your order qualifies for free delivery.

4

One Consolidated Delivery

We ship the gas in a single consignment and, when your supply is approaching renewal, we'll contact you to plan replenishment. Our team manage the entire process, so you can leave the work to us.

* Due to chemical stability, the lifespan of highly reactive mixes may be shorter. This is declared in advance.

THE PROOF IS IN THE SAVINGS

The true power of the FastCalGas 1-2-1 Service goes far beyond convenience. By consolidating all your gas needs into a single order, once every two years, you don't just benefit from FREE delivery — you begin to eliminate the hidden operational costs that quietly drain your budget. From the staff-hours your purchasing teams spend on multiple requisitions, to recurring agent handling fees and unexpected customs duties, the 1-2-1 service is designed to streamline your calibration gas supply chain.

For example, in the crude oil tanker case study below, that’s a saving of \$6,644 USD every two years for a single vessel. Imagine what could be achieved when scaled to your whole fleet.

Crude Oil Tanker

Standard Ad-Hoc Procurement Cost: \$11,952.00

PO DATE	ITEMS	CYLINDER COST	QTY	TOTAL CYLINDER COST	DELIVERY COST	AGENT FEES*

				\$4,383.00	\$0.00	\$925.00

THE NUMBERS SPEAK FOR THEMSELVES

Our analysis of real vessel order histories shows that the 1-2-1 service delivers a minimum four-figure saving every time. On average, fleets see a cost reduction of over \$5,000 USD per vessel, per year—and that's only based on the orders we see!

When you consider the full scope of your procurement, these savings are transformative. Rolled out across multiple vessels, the 1-2-1 service becomes a significant contribution to your fleet's financial efficiency.

Bulk Carrier with Scrubber Fitted

Standard Ad-Hoc Procurement Cost: \$9,810.00

Only calibration gas supplier offering
FREE DELIVERY

When you pair the streamlined procurement of the 1-2-1 service with our FREE Worldwide Delivery, the savings become impossible to ignore.

OUR PROMISES TO YOU

Revolutionary offers mean nothing without rock-solid service to back them up. Whether you choose a single order or our fully managed 1-2-1 Service, our commitment to you is absolute. We built our entire business on promises that other suppliers can't—or won't—make.

The End of Waiting

Your vessel can't wait, so why should you? We provide quotes within 4 working hours and 98% of our orders are shipped within 24 hours. Our simplified order processing and robust global supply chain make us the fastest in the business.

A Rock-Solid Guarantee

When you buy gases from us, they're GUARANTEED to be compatible with your make and model of detector because the gas concentrations are identical to your current gases - we offer bespoke mixes that can be formulated to the exact specifications you require.

An Expert Account Managed Service

Our fully account-managed service puts our expert specialists at your disposal. They handle the entire process from start to finish, including all hazardous cargo paperwork, to provide a fast, friendly, and truly hassle-free experience.

A True One-Stop Solution

We are your single source for all speciality, calibration, bump, and span gases, and can even arrange bespoke mixtures to meet 100% of your fleet's needs. Our commitment to sustainability means all our cylinders are fully recyclable, via an easy-to-use recycling tool.

Uncompromising Quality. Guaranteed Reliability.

When it comes to calibration gas, there is no room for error. The safety of your crew, the compliance of your vessel, and the performance of your critical equipment all depend on the absolute purity and stability of your gas supply.

That's why our commitment to quality is at the core of everything we do. We don't just supply gas; we deliver verifiable peace of mind.

Certified & Compliant Cylinders

Every cylinder we supply is manufactured and approved to the highest global and local standards, including ISO 11118:2015 and ISO 7866. This ensures total compliance and absolute safety on board your vessels.

Fully Traceable Gas Mixtures

We provide complete transparency and an undisputable audit trail. All our gas mixtures are NIST or NPL Weight Traceable and can be fully traced back to their original raw materials, guaranteeing mixture accuracy and quality.

Game Changing Shelf Life

Quality materials lead to superior stability. Our reactive gas mixtures boast an industry-leading 2+ years shelf life*, reducing waste and ensuring your gas is effective when you need it most. This is a direct result of our investment in the highest quality production methods.

Precision Flow Control

To ensure guaranteed compatibility and perfect gas application, we supply a complete range of high-quality regulators. Whether your system requires a demand flow or fixed flow regulator, we provide the precise equipment needed for accurate, reliable calibration every time.

Triple-Checked for Safety

Peace of mind is non-negotiable. Before any cylinder leaves the manufacturing facility, it is fully pressure checked and leak tested to guarantee its integrity, ensuring the safety of your crew during handling, transit, and use.

With FastCalGas, quality isn't just a promise - it's a guarantee.

* Due to chemical stability, the lifespan of highly reactive mixes may be shorter. This is declared in advance.

Ready for a Smarter, Simpler Way to Get Your Gas?

Stop the endless cycle of chasing quotes and paying for expensive, unreliable deliveries. Whether you need a single cylinder delivered quickly, or you're ready to transform your procurement with our 1-2-1 Service, and free delivery, our team is prepared to help.

For a FREE, no-obligation consultation on our 1-2-1 Service and to calculate your fleet's potential savings, contact our specialists today.
