SONDEX®

Optimized heat transfer solutions for marine applications

Marine vessels are equipped with systems that require service-friendly and seawater-resistant plate heat exchangers. Armed with our application knowledge and your input, we have developed an extensive plate portfolio that allow us to customize each heat exchanger to perfectly match your requirements. With our customized solutions, your installation will have a long lifetime and reliable performance.

Features and benefits

- ✓ Experience the benefit of a heat transfer solution that perfectly matches your requirements and lowers your energy consumption.
- ✓ High performance and a low pressure drop eliminate unnecessary burdens on your system and optimize overall system performance.
- ✓ The design results in a compact solution with a small footprint, simple installation, and easy access for maintenance.
- ✓ Our gasketed plate heat exchangers are available with a range of various approvals, as per customer requirements.

Cost-efficient solutions for marine applications

Fast replacement of various cooler models

Large stock of Titanium material

High spare part availability

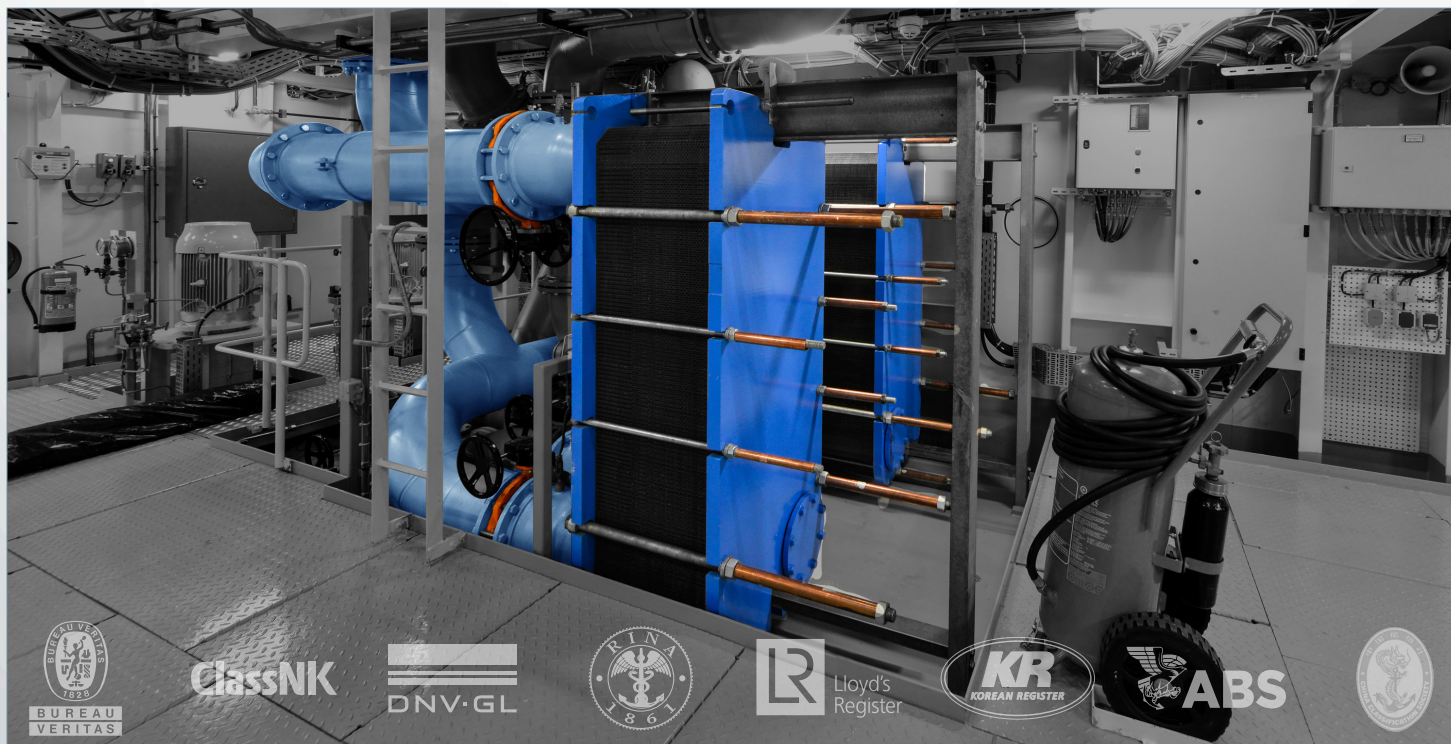

Connection sizes DN25 to DN650

On-site service and maintenance
