Offshore service

Ensuring Optimal Performance at Sea and on Offshore Platforms

At Marine Turbo we understand that your schedules can be tight, and repairs may need to be done whilst your ship is at sea. Our engineers have experience working on vessels on the move, so that you can be assured that we can, where appropriate, prevent you from remaining alongside and repair your turbochargers as swiftly as possible.

Your reliable worldwide service provider

Every year millions of miles are being covered by ships whose turbochargers we have maintained, provided swap cartridges or repaired parts – all with 12 month warranty. It is a responsibility we take seriously. Our work is carried out with the backing of over five decades of company internal knowledge and engineers with time-served expertise. All services, repairs and remanufacturing are backed by Lloyds Register Quality Assurance processes which means you can be assured of the industry leading quality of repairs and level of compliance to classification bodies when applicable.
