SEPARATORS

Since 2005, SF Marine has developed an extensive range of top quality, non-original/OEM, fully interchangeable, spare parts, suitable for Alfa Laval and Westfalia separators, Mitsubishi purifiers, IMO Pumps, Plate Heat Exchangers, Nirex freshwater generators and Moatti back flushing filters.

Our company can provide as well complete reconditioned separators, exchange bowls and complete IMO pumps.

Throughout the course of the company's development, our spare parts program has grown to an extent that has resulted in a stock amount of over 25.000 different types of spare parts.

The scope of our program varies from mechanical components, hydraulics, pumps, gaskets, control units and tools through an extensive range of applicable components and gaskets for heat exchangers.

SF Marine is not directly affiliated to any brand and/or maker. The use of part numbers/models/types/names is for reference only. It is not intended that SF Marine parts are supplied by Original Makers.

PLC series for Westfalia Separator WSCF

Control unit / switchboards

A series of control units, perfectly interchangeable with the original ones but extremely cheaper and simpler, are available for both Alfa Laval and Westfalia separators.

The control units of our production can replace the following series:

C7-613 – C7-623 – EPC 400 – EPC 41

W-SCF control units are designed to be compatible with GEA WESTFALIA old and new generation purification plants.

- - They are assembled and wired with Siemens LOGO 8.4. series PLCs and certified to work on board ships and on shore plants. They are plug and play.
- - They are pre-programmed and parameterized on the individual centrifuge required by the customer according to the type of service.
- - The units come with manual and quick and easy installation instructions.
- - It is necessary to provide purifier type, service type (oil, fuel, diesel)

They are manufactured in 4 series:

- - W-SCF 623 and 626
replacing respectively GEA C7 623 and C7 626 units for the older generation OSA, OSB, OSC series centrifuges.
- - W SCF 613 and 635
replacing respectively GEA units D10 613 and D10 635 dedicated to the new generation centrifuges series OSD, OSE.

The delivery time is about 2 weeks
