

APS[®]
GROUP
FINLAND

**HIGH TECHNOLOGY CABLES &
CONNECTIVITY SOLUTIONS**

APS was established in 2005 in Finland, the land of telecommunication, with the aim of designing standard and special cables as well as complete cabling solutions for the Scandinavian countries.

Having its strong base in over 25 years of experience in the manufacturing and installation of the cable, APS is able to answer successfully the calls for a dynamic, technologically advanced company capable of developing, manufacturing, and guaranteeing the quality of wires and cables for the most diverse applications.

At APS, we strive to ensure that the best quality solutions are provided to you.

FINNISH CABLE TECHNOLOGY PUT TOGETHER FOR THE WORLD

“

The objective of our business is to create a superlative customer experience, to deliver services, products and quality that exceed the expectations.

”

Founder

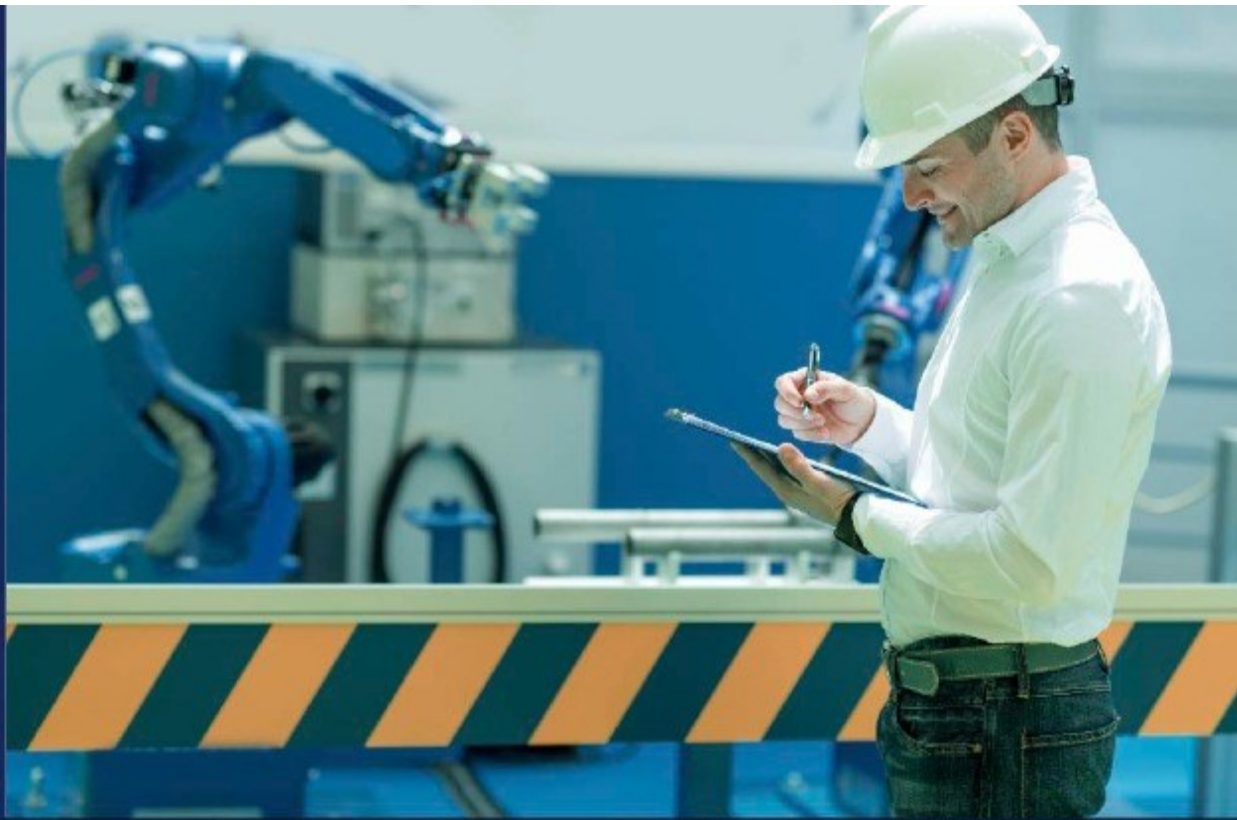

Alessandro Psenda

At APS, we offer an extensive range of high-quality standard and special cables to service the most diverse applications. Our scope includes copper, fiber optic, and hybrid cables for signalling and communication in the most varied environments.

From the coldest to hottest climates, underground or underwater, in corrosive muds, the more challenging the application and the environment, the more engaged our team will be. We aim to deliver to our customers exactly what they need, where they need it, and when they need it.

COMMITMENT ON OUR EXPERTISE

APS was established to serve as a supplier of special cables and cabling solutions for telecommunication and data networks.

Our primary focus is on the present and future trends of cable communications, especially as it pertains to Power Distribution, LAN, Access, FTTx, and Data Center.

Our Mission:

To exceed our customers' expectations contributing to improve their efficiency by means of an excellent service and advanced technical solutions.

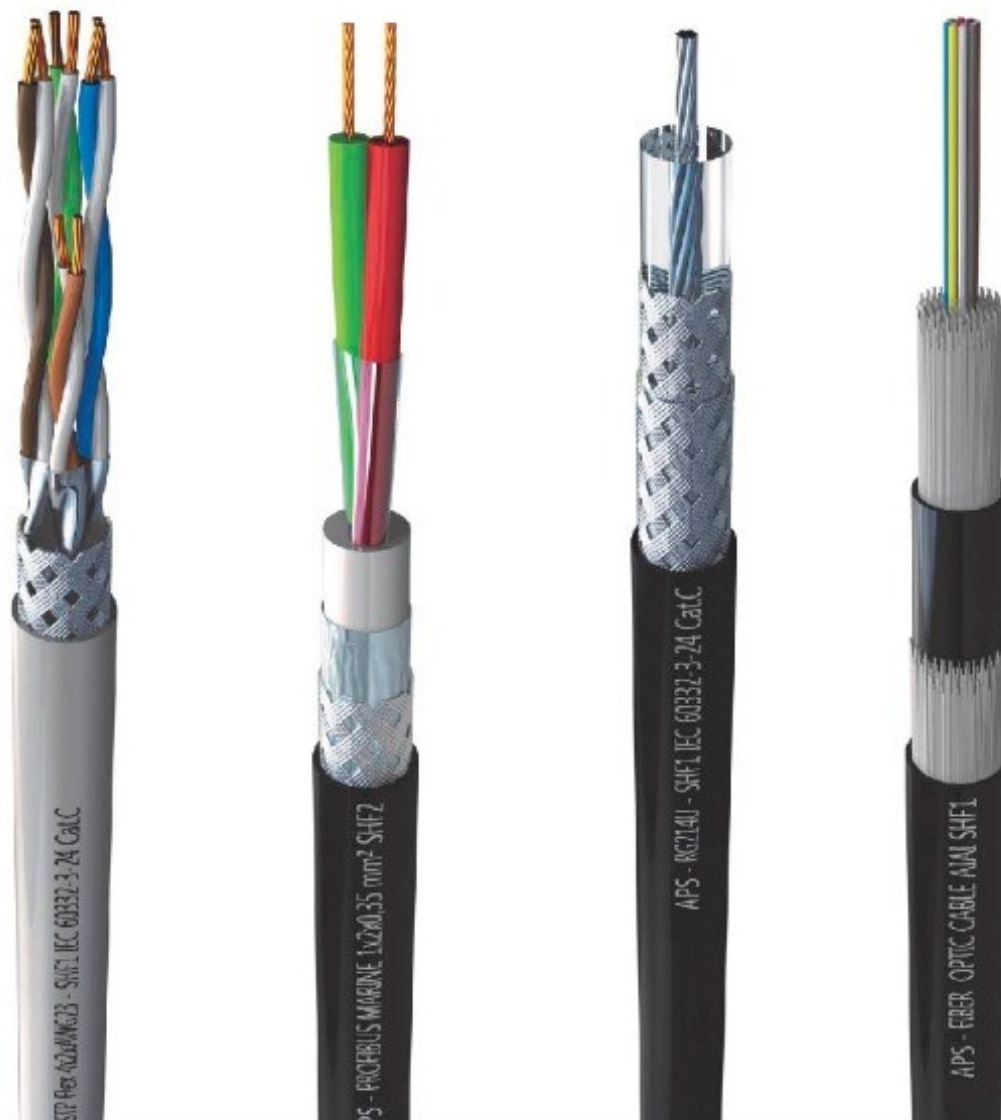

To consolidate our reputation of trustable and reliable partner for the design, development, production and supply of cables and cables solutions.

To achieve newer goals as cable partner, as motivating and pleasant working environment, as profitable business operator.

PROFESSIONALS IN WHAT WE DO

Our experienced technical personnel designs the cable with care to meet the customer's requirements or needs in accordance with the given specifications.

To ensure we serve industries with a complete range of power, communication and special cables that are robust, long-lasting, and designed for optimal performance.

Today, APS has earned recognition from various international accreditation bodies, as seen by the certificates and approvals we carry.

BUILDING RELATIONS, SERVING QUALITY

Our Brands:

TKAPAC®

TECNIKABEL APAC has been designing and producing special electrical and optical cables in high technology sectors primarily for the On & Offshore, Marine, Petrochemical, Rolling Stocks, Metro Lines, Ports and Subsea industries.

AME®

F4A Finns 4 Asia

AME is a brand of APS Group Finland developed for the Onshore and Critical Industrial sectors. We focus on cables construction requiring LSZH, Flame and Fire resistant with armor protection for infrastructures and key installations.

LabLAN®

Laboratory Local Area Network

LabLAN is a brand of APS Group Finland developed for the comprehensive connectivity on Security Locks, Network Solutions, Junction Boxes, Ethernet Switches, as well as LAN & Fiber Optic network components for the group.

INDUSTRIES WE SERVE

- OFFSHORE
- MARINE
- OIL & GAS
- INDUSTRIAL
- HOSPITAL
- SECURITY
- POWER UTILITIES
- WATER UTILITIES
- METROLINES
- RENEWABLE ENERGY
- AIRPORT
- AUTOMATION
