Defining environmental protection since 1977

Environmental Protection Engineering S.A.

Follow us on:

OUR COMPANY

Environmental Protection Engineering S.A. (EPE) established in Piraeus in 1977, and offers a complete range of environmental protection services and products, including emergency response services for oil and chemical spills.

EPE provides contingency and preparedness services to all types of onshore and offshore facilities always in full accordance with all relevant legislation and industry standards.

By continuously investing in R&D, EPE is a leading company in designing and production of various types of marine equipment and systems such as bilge oil water separators, sewage treatment plants, potable water related systems, sacrificial anodes, antifouling and cathodic protection systems. EPE has also established trustful collaborations as a sale agent for sprinkler, sewage and stainless steel piping systems as well as other electronic equipment for ships.

EXPERTISE

40 Years of Experience
Thousands of Incidents

RESPONSIBILITY

First to Respond
with Superior
Solutions

INNOVATION

Leading

TOTAL SOLUTIONS

Total Environmental
Solution Providers in
East Med.

Marine and Industrial Equipment and Products

MEET OUR PRODUCTS

The manufacturing activity of EPE began in 1982 with the design and production of marine environment protection equipment from ships effluents. All products are certified by the relevant National and International Authorities and Classification Societies.

Aiming at providing complete and reliable solutions for the environmental protection and safety systems, EPE cooperates with major strategic partners. We offer a wide spectrum of products which exceed our customers' expectations whilst building long term and loyal relationships.

RANGE OF PRODUCTS

WASTE WATER TREATMENT

- POSEIDON FIT
- TRITON FIT
- TRITON EC

WATER TREATMENT

- ALIOS
- ALIOS EVO

HARMFUL AIR EMISSIONS

- HERMES

CATHODIC PROTECTION

- ALUMINUM ANODES
- ZINC ANODES
- ANTIFOULING ANODES
- ICCP – MGPS SPARE PARTS

DECARBONISATION

- NaviPULSE

SERVICES

- 24/7 SUPPORT AND TROUBLESHOOTING
- MAINTENANCE AND ANNUAL CALIBRATION
- INSTALLATION SUPERVISION & COMMISSIONING

POSEIDON FIT

Bilge Oil Water Separator

Our industry standard bilge oil water separator, certified for 5PPM. Redefining simplicity with automated operation. Certified by IMO RES, MEPC. 107 (49).

TRITON FIT

Physiochemical Sewage Treatment

TRITON FIT is a physiochemical sewage treatment plant that fully complies with the requirements of IMO/MEPC.227(64). The accessibility from one side allows ship designers to plan space in the engine room on a whole new level. Both its very compact size and extended treatment capacities make TRITON FIT ideal for modern Superyachts that accommodate up to 30 people on board.

TRITON EC

Electrochemical Sewage Treatment Plant

TRITON EC is designed for waste water treatment on board merchant ships, Navy vessels, yachts, ferries, small cruisers, offshore platforms and most other marine type applications.

ALIOS & ALIOS EVO

Fresh Water Generator

ALIOS & ALIOS EVO is a proven alternative to the production of fresh water with evaporation, since there is no need for the operation of the main engine or the boiler of the vessels, thus minimizing energy consumption.

HARMFUL AIR EMISSIONS

HERMES

Black Smoke & Odor Eliminator

Our HERMES Soot Elimination System is ideal when yachts are in anchorage. At last, your guests may enjoy the sea and the sun without worrying about those harmful emissions. HERMES reduces harmful air emissions from diesel generator gases by eliminating Black Smoke (BS) and harmful Particulate Matter (PM).

DECARBONISATION

NaviPULSE

Variable Frequency Drive

NaviPULSE VFDs offer cutting edge technology designed to maximize efficiency & minimise costs. Perfect for marine applications, these drives are engineered to provide unparalleled savings while reducing your environmental footprint.

Marine Sacrificial Anodes & Antifouling Anodes

EPE is a leading specialized supplier of Sacrificial Anodes and cathodic protection internationally, with applications to subsea infrastructures, shore and land structures, underground pipelines, wind farms, jetties, ships & yachts.

Aluminum Anodes

The chemical composition of aluminum anodes is based in the well-established Al-Zn-In and it is suitable for most sea water applications. Their electrochemical capacity is more than three times greater than the capacity of zinc. It is the most widely used alloy for the cathodic protection of ships and other marine metallic structures.

POLCOR's pre-casting quality secures the concentration of all important elements (either impurities or alloying elements), even in very low concentrations, in order to strictly conform to the specification.

Zinc Anodes

The Zinc alloy type is the well-established formulation based on US MIL – A – 18001K specification. It is suitable for general seawater applications. Its low electrochemical capacity makes it suitable for coated structures where the current demand is significantly reduced.

Antifouling Anodes

We provide Antifouling spare electrodes (Copper-Aluminum, Copper-Iron) as per your requirements for any kind of Impressed Current Antifouling System you may have on board.

Our flexible production line ensures very cost efficient rates in addition to our quality control system that guarantees reliable operation of POLCOR spare antifouling electrodes.

PRINCIPALS

EPE cooperates with major strategic partners, offering a wide spectrum of leading high-quality products.

Decarbonisation Solutions

TORQUE & SHAFT POWER
MEASUREMENT SOLUTIONS

Introduction

EPE's IHM Maintenance Platform is a Cloud-based solution supported by experienced HazMat experts for maintaining vessel's Inventory of Hazardous Materials in real time. EPE's IHM Maintenance Platform aims:

Shipowners/Managers

- Ensure compliance with applicable Regulation (*EU No.1257/2013, HKC 2009 & IMO Resolution 269(68)/2015*)
- Keep fleet IHMs maintained and up to date
- Online library of incoming MDs/SDoCs accompanying POs
- Receive automated IHM report exports 24/7
- Gain valuable insights with important KPIs on fleet's compliance and suppliers' performance
- Provides relevant PO data (at predefined intervals) or via API (ability to connect to all ERP Systems)

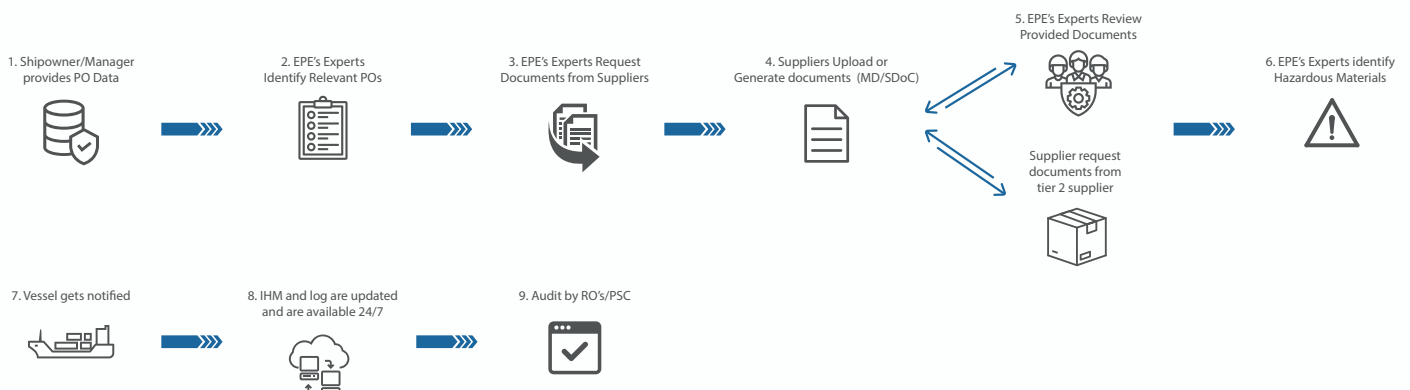

Suppliers to Marine Industry

- Browse through IHM docs requests (MDs & SDoCs)
- Generate, upload & submit IHM docs online
- Request IHM docs by sub-suppliers
- Create HazMat database for product catalogue
- Receive support from EPE's HazMat Experts

Key Features

- Reduce costs with a turn-key online service & a fully trained and experienced HazMat team
- Save time by interacting on a user-friendly interface
- Ensure fleet compliance by identifying relevant items (< 30% fall into scope)
- Reduce the burden for suppliers by avoiding unnecessary requests
- Gain insights by accessing valuable data
- Access 24/7 on any internet browser without installing unnecessary software
- Stay secure with web servers that guarantee secure data
- Boost reliability with an IHM Service Provider approved by 5 Classification Societies (DNV, ABS, LR, BV & KR) and 2 Flag States (Marshall Islands & Liberian Flag)
- Become auditing-ready by giving 'Guest' access to ROs/PSCs upon request
