High-quality CPR under even the most challenging circumstances

The AutoPulse® NXT Resuscitation System lets your team quickly begin automated compressions that continue through treatment and transport. AutoPulse NXT Band technology accommodates patients with a chest circumference of up to 56 inches, so you can treat a broader range of patients.

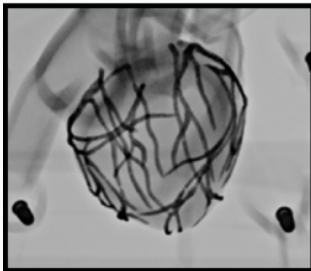

Resuscitation on the Move™

In an offshore setting, emergencies like cardiac arrest can occur in unpredictable conditions (e.g., during **turbulent weather** or on **uneven surfaces**). The AutoPulse system delivers consistent, high-quality, hands-free chest compressions regardless of the environment, increasing the likelihood of survival.

DEPENDABILITY ACROSS THE CONTINUUM OF CARE

AP 0°/0°

RAO 10°/CRAN 30°

The AutoPulse NXT platform is designed to be more transparent, allowing for visibility during X-ray imaging.

A Complete Resuscitation Solution

- Accommodates patients with chest circumference of 30 to 56 in. and a weight of up to 400 pounds
- Radiolucent design provides clear imaging under fluoroscopy
- AutoPulse NXT transporter holds all necessary components, ensuring your team is always code ready

ZOLL® AutoPulse® NXT

In the marine offshore industry, where medical emergencies are challenging to handle due to isolation and environmental factors, the **ZOLL® AutoPulse® NXT Resuscitation** System is an invaluable tool for improving response efficiency and patient outcomes.
