

带气水分离装置可闭百叶窗

261JC1401-00

Closable louver with separate air and water fitting

本带气水分离装置可闭百叶窗用于舱室的进气，为保证进气时雨水浪花的大量侵入，改善舱室环境或造成机舱内柴油机吸入大量水分导致熄火而设置。

This closable venetian blind with air-water separator is used for the air intake of room, it is installed to prevent rainwater and spray from entering into the room when air intaking, improve the room environment and avoid the cut-off misfire of engine caused by sucking in a great amount of moisture.

百叶板打开位置为旋转 $\geq 50^\circ$ 。

Opening angle of blind board is $\geq 50^\circ$.

上图气动式，另有手操式可选。

Above figure shows the pneumatically operated funnel closable venetian blind, in addition, the manually operated funnel closable Venetian blind can be selected.
