

SOUTHLAND
ELECTRICAL  SUPPLY

AN  **IPS COMPANY**

PRODUCT. PEOPLE. SERVICE. **WE ARE YOUR SOLUTION**®

Southland Electrical Supply specializes in solutions. Since 1987, Southland has made a commitment to our customer that is simple: reliable products, reliable people and reliable services with the best value and the lowest prices. No matter what your need, Southland gives you our promise to have what you need, where you need it – regardless of when that may be. With an extensive inventory and incredible vendor network, Southland takes pride in providing customers a hassle and worry-free experience backed by products that are certified safe, reliable and ready to go to work.

1.800.476.1486
southlandelectrical.com

WE'VE BUILT OUR REPUTATION WITHOUT COMPROMISING QUALITY

SERVICE IS OUR PRODUCT

Our highly experienced, certified technicians are available to you 24/7/365 with repairs, replacements and overnight delivery during emergencies.

6 locations across the southeast, an inventory of over 200,000 square feet and our extensive vendor network ensure we can help you find exactly the right product.

Our solutions are not one-size-fits-all. We will custom design, engineer, upgrade or retrofit a solution tailored to fit your needs.

All of our testing, repair, reconditioning and retrofitting services meet or exceed PEARL standards. You will receive products that are certified safe, reliable and ready for installation.

Field services and on-site visits bring our qualified expertise to you.

Our rental equipment and replacement program keeps you up and running even during catastrophic disasters or power failures.

We provide troubleshooting and free evaluations on all repairs.

Southland Electrical Supply was built on the values of service, people and hard work, principles that would grow and nurture a business through 30 years, three generations and thousands of customers. Servicing the entire country with six locations across the southeast and over 140 employees, the hard work of a father-and-sons team has reached greater heights than anyone could have imagined.

However, the future of Southland was not always so sure. After its inception, a fire threatened to end a family business that was still in its infancy.

"WHEN YOU'RE A CUSTOMER WITH SOUTHLAND YOU'RE FAMILY. THAT'S THE LEVEL OF SERVICE WE HAVE PROVIDED FOR 30 YEARS, AND WILL CONTINUE FOR THE NEXT 30 AND BEYOND. "

"It was a total disaster. We lost everything; our entire inventory was destroyed" owner Jim Griggs had to say about the tragedy. It took a heart of determination and years of tireless work, but Southland never closed its doors.

The recovery has brought multiple facility expansions that amount to over 200,000 square feet and an unprecedented inventory of equipment dating back to the 1920's, allowing Southland to establish itself amongst competition as an authority in Power Distribution and Low Voltage Motor Control.

"If people and businesses have their lights on, they are going to need what we have. We will be here to provide the product and service they need, new or old", says Griggs. It is Southland's mission and passion to provide customers with a quality product from a staff who has the expertise to back it up.

"When a problem shuts your business down, standard shipping times and regular business hours aren't what matter. Southland will do whatever it takes to get equipment delivered when our customers need it most" says George Roberts, a long time Southland employee. "When you're a customer with Southland you're family. That's the level of service we have provided for the last 30 years and will continue for the next 30 and beyond."

Southland Electrical Supply looks forward to the opportunity to exceed the expectations of customers. We are satisfied with nothing short of our customers' complete satisfaction. We will continue our aim to bring you the highest level of service and standards that the industry can provide. Southland understands that a simple statement is not enough but enthusiastically accepts the challenge to earn your trust. We invite you to join us as we continue to cultivate a legacy of excellence, quality and expertise into our next 30 years.

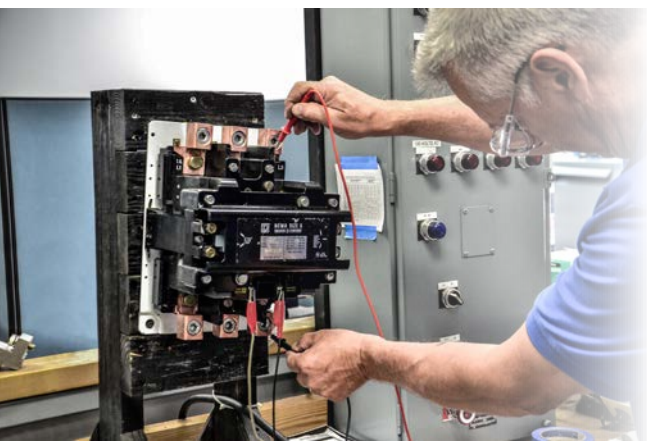

SERVICE FOCUSED PEOPLE DRIVEN

Our vast product inventory along with our highly knowledgeable staff and service capability give Southland Electrical Supply the unique ability to create power distribution solutions for customers who span a wide variety of industries. Listed below are just some of the industries Southland has serviced in the last 30 years, plus many more. Contact us directly and our experienced team will create a customized solution tailored to fit your needs.

INDUSTRIES SERVED:

- Aeronautics
- Aggregates
- Agricultural
- Automotive
- Commercial & Industrial Machinery
- Construction
- Education
- Electrical
- Equipment Rental
- Food Production
- Health Care
- Hospitality
- Manufacturing
- Municipal
- Nuclear Power
- Oil & Gas Production
- Solar
- Telecommunications & Media
- Utilities
- Water Treatment

REPAIR

WE'RE HERE TO HELP

In case of natural disaster or equipment failure, Southland is here to help. Our experienced staff is on call 24/7/365 to provide emergency support and overnight delivery to minimize your downtime and get you back up and running quickly.

REPAIR SERVICES INCLUDE:

- Clean, Paint & Replate components as required
- Re-Assemble
- Apply fresh lubrication to all moving parts
- Complete Inspection
- Mechanical Safety & Electrical Testing
- Documentation of Testing Results

Southland is PEARL Certified and an associate member of NETA. PEARL is an accredited ANSI standards developer for reconditioning and testing electrical equipment. Southland offers third party NETA testing and custom-built UL-508A panels.

The testing and reconditioning services Southland provides will always be done to OEM standards and industry best practices. You will always receive parts and equipment that will live up to high standards in quality and reliability and be ready for installation and service.

TESTING

We provide quality testing, repairs and custom built equipment by our certified technicians. Our inventory contains spare parts and components dating back to the 1920's. We build custom switchgear, low voltage distribution and service entrance equipment up to 5000A / 600VAC. Our repair services will bring your equipment back to full working order and extend the overall lifetime. All services are backed by our 1 Year Warranty.

TESTING SERVICES INCLUDE:

- Primary Injection to OEM trip curves
- Secondary Injection pass/fail (solid state trip) specific to OEM
- Contact Resistance Testing
- Megger Insulation Resistance
- AC/DC HIPOT Insulation Resistance
- Device Testing UVR, Shunt, Auxillary Motor Operations, Ground Faults
- Labeling of Accessory Components
- Torqued/Bolted Connections
- Mechanical Testing of reliability and/or interlocking/device operation
- Basic Multimeter
- Power Checking with full voltage
- Noise in DB
- DGA (Dissolved Gas Analysis)
- TTR (Transformer Turns Ratio Testing)

CIRCUIT BREAKERS

Southland cleans, reconditions and tests each circuit breaker sold and backs them with our 1 Year Warranty. Southland offers full testing and recertification on your existing equipment, giving you service-ready spares. Call and speak with one of our sales representatives for more information on our vast inventory of circuit breakers from 5 to 5000 amps.

TECHNOLOGY UPDATES AND MECHANICAL UPGRADES ARE AVAILABLE INCLUDING:

- Trip Units with Arc Flash Reduction
- Metering Packages
- Maintenance Mode Switching
- Shunt Trips
- UVR's
- Auxillary Switches
- Bell Alarms
- Lock Out Tag Out Provisions

"Working with Southland was a huge success!! We removed a safety issue at the same time decreasing our load on the compressors by 15% which has contributed to lower operating temperatures which will add longevity to the motors and a huge energy savings for the plant."

STARTERS & CONTACTORS

Southland provides full service on all motor starter and contactor models and manufacturers. Our certified technicians will test and repair, or replace your aging electrical equipment.

While your equipment is being serviced, Southland has the capabilities to provide what you need when you need it with renewal parts and critical spares.

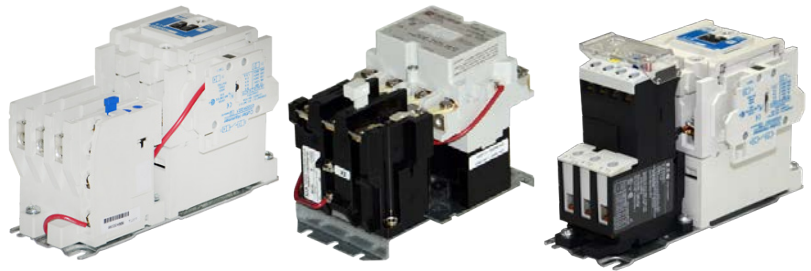

- Low & Medium Voltage NEMA Sizes 00-7
- Reduced Voltage Soft Starts/Drives
- Combination Starters
- All Major Manufacturers
- Vintages from 1920's to Present
- New, Surplus & Reconditioned
- Obsolete & Hard-to-find

TRANSFORMERS

Southland's reconditioning and repair services will bring your transformer back to full working order. Our standards meet or exceed industry requirements and OEM specifications. We service and repair all transformer types and manufacturers.

- Dry Type & Oil Filled
- Control Power Transformers
- Substation & Pad Mount
- Encapsulated
- .05 to 10,000 KVA
- 1 Phase & 3 Phase

RECONDITIONING AND UPGRADING SERVICES INCLUDE:

- Rewinding
- Repainting
- Weld Repair on the majority of tank deformities
- Complete Oil Sampling and Analysis
- Gauge Packages
- SCADA Integration
- Regasketing of all sealed surfaces on transformers and transformer components
- Replacement of all components associated with standard electrical transformers (dry type and oil filled)

WE HAVE IT... WHAT YOU NEED
WHEN YOU NEED IT

The background image shows a vast industrial interior, likely a power substation or manufacturing plant. It features long, straight aisles with a highly reflective, polished floor. On the right side, there are multiple rows of tall, grey electrical cabinets or switchgear, each equipped with numerous red and black control panels and switches. In the distance, a white door with a red 'EXIT' sign is visible. To the left, there are more industrial structures, including a large yellow cabinet. In the foreground, a smaller, light blue outdoor electrical enclosure is shown, which has several doors and a small access panel on its side.

E-HOUSES

Southland has New and Reconditioned Integrated Power Assemblies, or E-Houses, empty and ready to install your equipment or customize to your specs. E-Houses bring all of your power distribution equipment into an integrated and fully functional, climate controlled unit, protecting it from the elements.

Each building comes with a comprehensive product manual and a replacement parts reference guide.

As with all of our products, E-Houses and their equipment come backed by our 1 Year Warranty.
