

IPS Distribution

IPS Distribution:
Delivering Reliable Solutions

Keeping Your Operations Moving

IPS ensures quick and easy access to the equipment you need through our extensive distributor network. Our experienced, locally based teams are committed to providing responsive support to keep your operations moving. As a master distributor for industry-leading brands across North America and the UK, IPS delivers optimal solutions for your toughest challenges.

Benefits:

- **Extensive Inventory:** Over 1,500 suppliers with a large inventory of products ready for immediate shipment.
- **24/7 Availability:** Reliable support is available around the clock to meet your needs.
- **Strategic Facilities:** Strategically positioned facilities for timely delivery and seamless operations.
- **Integrated Services:** Bundled sales with unit exchange, equipment removal, storage solutions, and comprehensive asset management.
- **Expert Support:** Delivery, start-up commissioning, and ongoing field service to maintain uninterrupted performance throughout your equipment's lifecycle.

We stock a wide range of equipment:

AC & DC MOTORS

GENERATORS

VFDs

GEARING, PUMPS, FANS & BLOWERS

REPLACEMENT & SPARE PARTS

POWER DISTRIBUTION

Master Distributor for Key OEMs

IPS partners with leading manufacturers to deliver the right solutions for your applications. Our pricing agreements and extensive inventories—national and international—ensure you get what you need when you need it. Key OEMs include:

BALDOR • RELIANCE

We provide access to top brands, guaranteeing immediate access to industrial parts and inventory management solutions.

Additional Distribution Services:

MOTOR MODIFICATIONS

IPS offers motor modifications to minimize downtime. Our technicians can extend the life of old motors or adapt new motors for your application.

Our motor modifications include:

- Engineering support for both new and legacy motors to improve operating reliability and maintenance.
- Installation, alignment, and commissioning combined with motor modifications.

REMANUFACTURING

IPS provides remanufacturing services when customers have no commercial alternative. We remanufacture electric motors, generators, rotating equipment, and power distribution equipment to maximize performance and extend service life.

Our services include:

- OEM-quality parts, processes, and specifications to restore equipment.
- Design and reverse engineering for obsolete drives, plus replacement parts.
- Upgrading motors and generators with advanced designs and materials for more horsepower or efficiency.

CNC PRECISION PARTS MANUFACTURING

Our metalworking specialists produce and ship over 70,000 CNC parts annually to customers, OEMs, and distributors. This operation handles rush jobs, including short and long production runs, with OEM quality or better.

EXCHANGE UNITS

IPS exchange units are ready to ship. We carry new and exchange equipment across our extensive network of service centers and distributor hubs.

- Wind Generator Exchange Units
- Servo Motors
- Mining Motor Exchange Units

IPS DISTRIBUTION
