IPS is experienced in the repair and maintenance of electric motors and generators found at pipeline pump and compressor stations. We can service small and very large motors up to 15 kV & 145 ton

Emergency Power Systems

With regional service centers strategically located across North America, IPS offers the oil and gas industry single-source service and repair capabilities for electric motors and generators up to 15 kV. Our pipeline experience includes both pump and compressor stations for the transportation of oil, natural gas and natural gas liquids.

We offer in-shop repair, field service, distribution, managed asset storage and custom manufacturing of drop in replacement electric motors and generators, stators, rotors, armatures and spare parts. We have extensive experience in working with all types of electric motors and generators from small to those weighing 145+ tons and 15 kV. This includes AC & DC, Induction, Synchronous, Explosion Proof, Permanent Magnet, Squirrel Cage, Rotor Bar, Vertical, Hermetic, NEMA, Above NEMA, IEC, API, etc.

IPS is strategically located near North America's pipelines

- Mechanical and Electrical Repair and Testing for all makes/models of Generators and Switchgear
- Load Testing to CSA282 Standards to meet Manitoba Fire Code Requirements
- Ability to test systems from 1.6 kW to 1.2 MW
- Factory-trained and provincially-licensed technicians
- Testing and service of UPS Systems
- Service contracts available
