FIELD SERVICE

IPS field service technicians have industry-specific experience you need. They understand your operating issues and have the technical resources and knowledge to solve your toughest maintenance and reliability challenges.

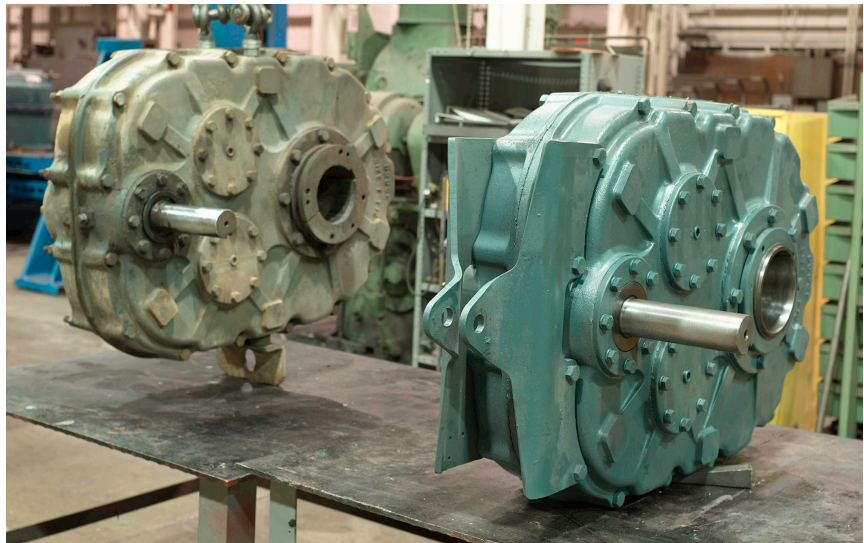

Predictive & Preventive Gearbox Maintenance

We provide gearbox health assessments for critical asset management, insurance requirements, and annual budget support. We also inspect and test in response to equipment issues.

For recurring problems with misalignment, vibration, or thermal instability, we can install condition-based monitoring systems.

Predictive and preventive services include:

- ✓ Vibration analysis
- ✓ Motion amplification technology
- ✓ Thermography
- ✓ Spare parts audit
- ✓ Oil samples
- ✓ Cryogenic cleaning
- ✓ Bearing changes
- ✓ On-site machining

Gearboxes before and after reconditioning.

AVAILABILITY

- ✓ Coast -to-coast network of in-house repair, field services and distribution.
- ✓ Available 24/7 for emergency service and outages
- ✓ Pick-up and delivery service
