

Actuation Valve

Corporate Overview

**Market leading
valve and actuation
solutions**

Actuation Valve provide market leading valve and actuation services to the marine, chemical, consumer health, water and general process industries.

With large UK stock facilities we have the ability to provide high quality, off the shelf product solutions from world leading manufacturers for some of the most demanding applications. Working closely with our customers, we have the experience and expertise to analyse and understand your exact requirements, offering innovative design, product installation and after sales support.

Trading successfully since 1995, Actuation Valve remain a privately owned, market leading valve and actuation solutions based company with a worldwide customer base. Our technical support team is second to none in the industry and enables us to offer sales, advice, design, build, assembly and testing under one roof.

Introducing Actuation Valve

We are continuously working with prestige blue chip companies and are recognised industry wide for the level of service that we provide, something which has remained at the forefront of our focus since the early days of trading. Our experience, relationships and distribution agreements with some of the world's leading valve and actuator manufacturers provide the foundation on which we have built a strong reputation for quality, cost effective, fit and forget solutions for all industries including marine, chemical, petrochemical, oil and gas, consumer health, food and beverage, plus water.

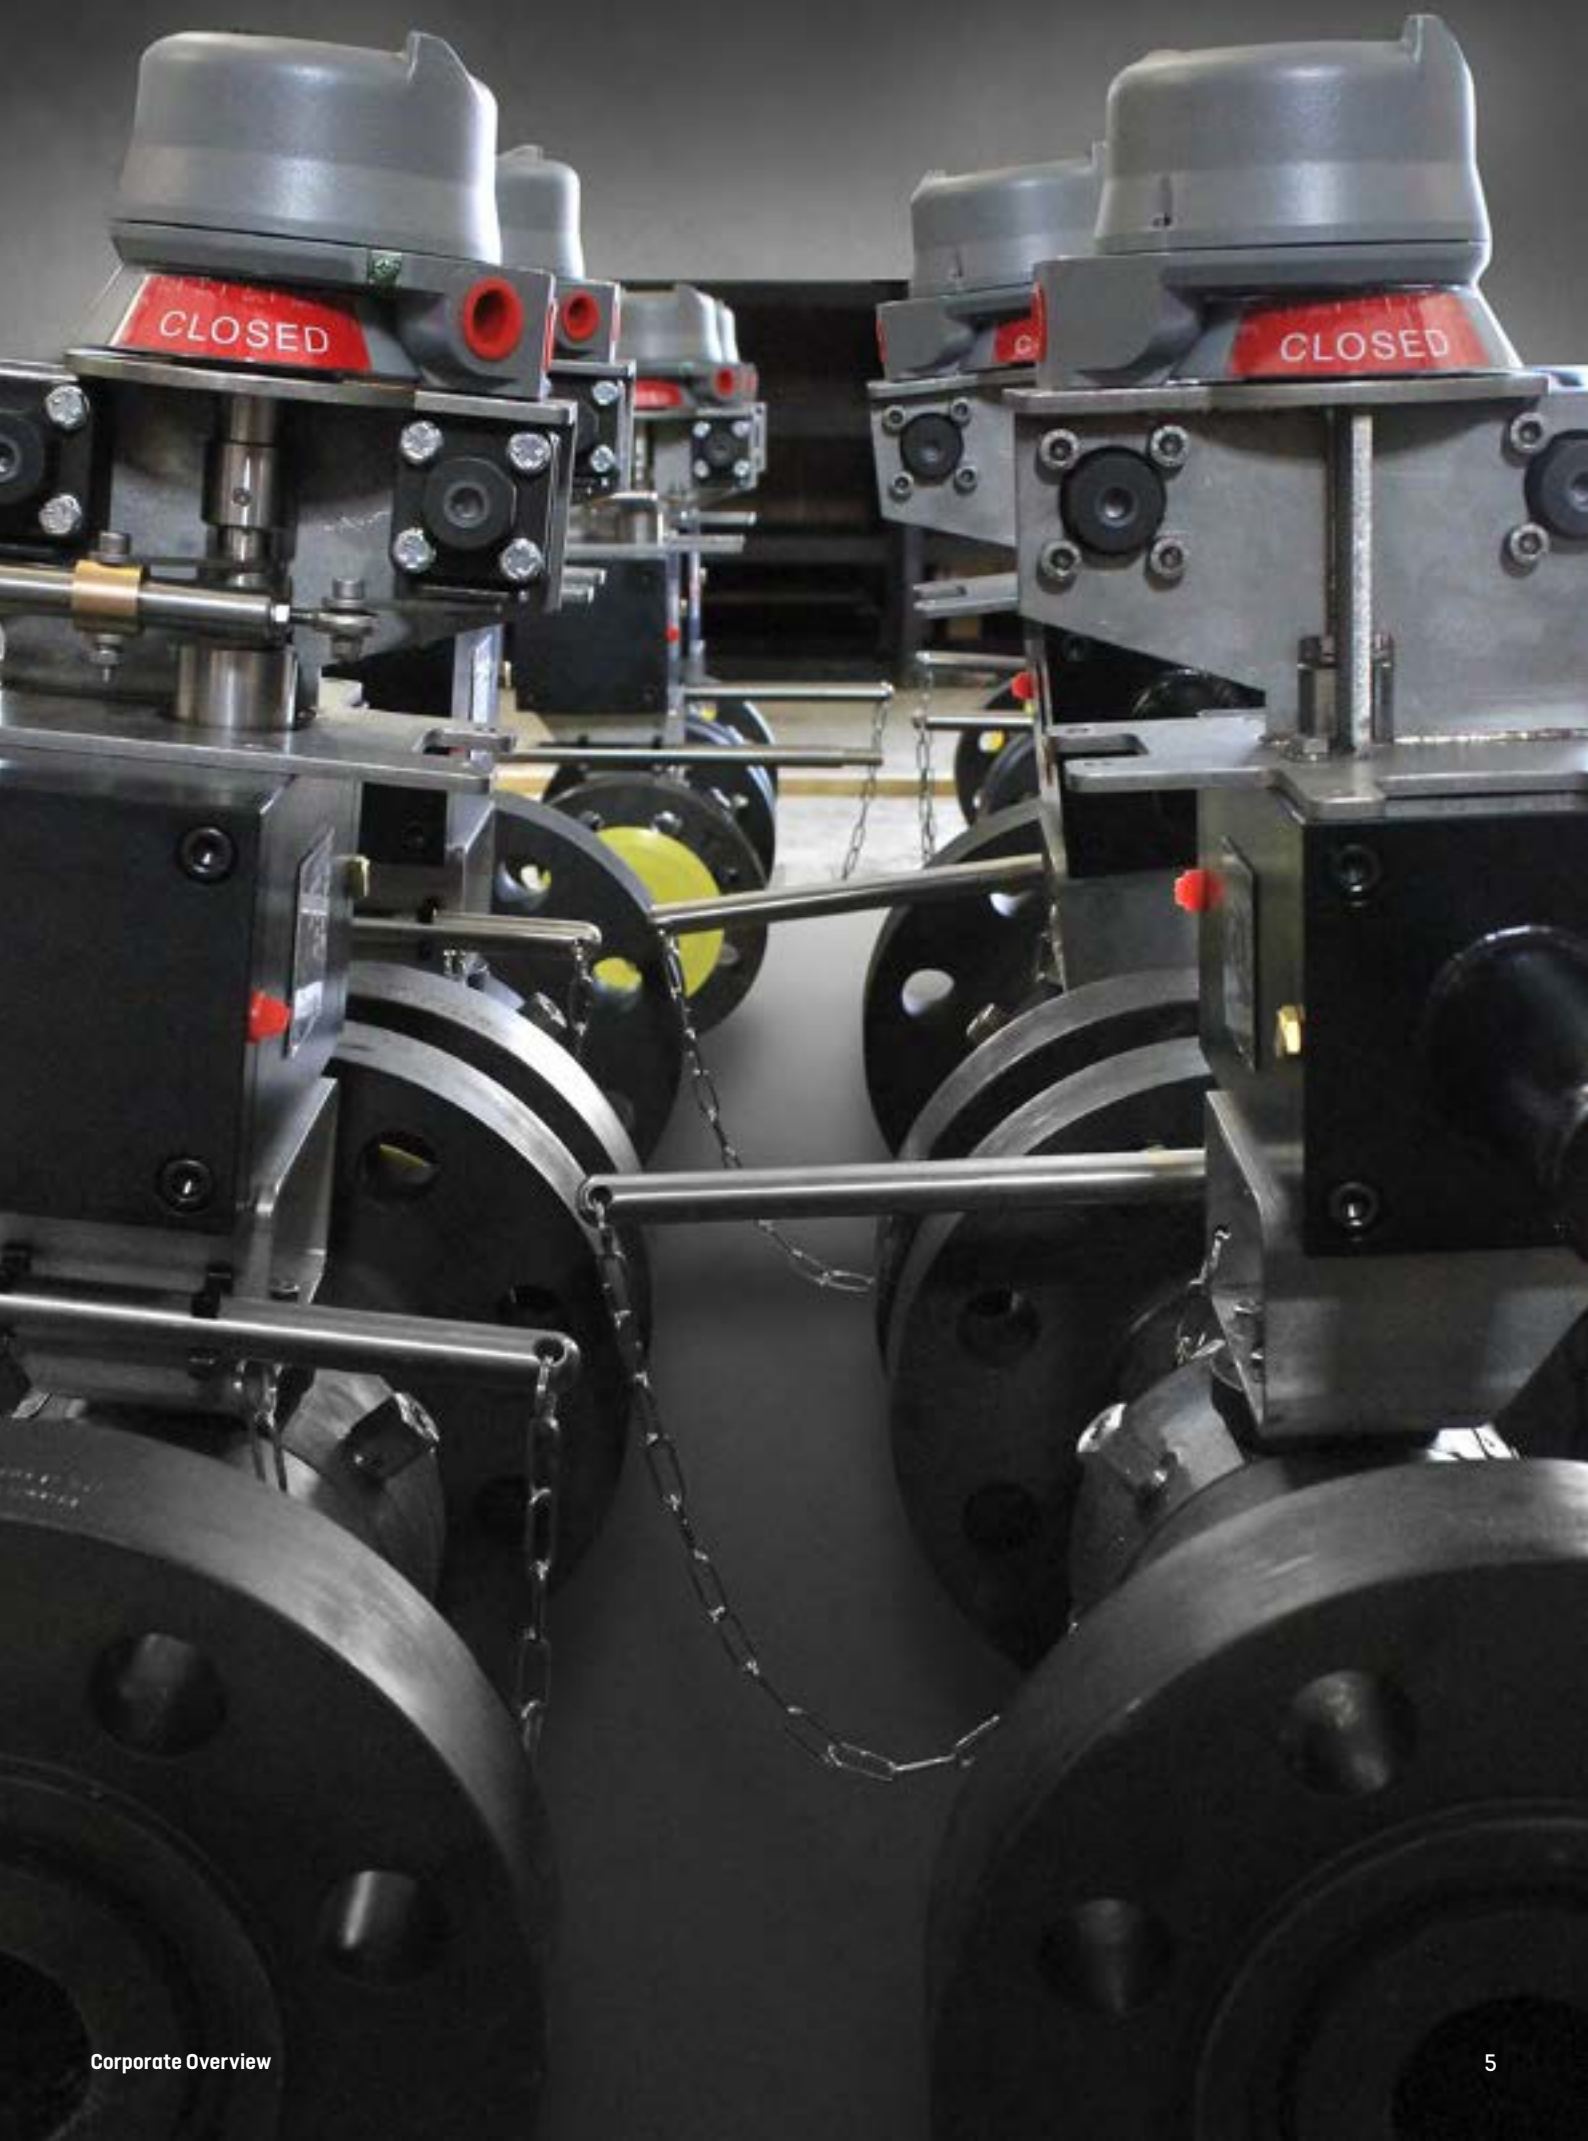

With innovative product designs and technology advances we are continuously pushing boundaries to assist our customers to improve productivity, compliance and sustainability with services you can depend on when you need them most. When it comes to valve and actuation or ancillary product supply, at Actuation Valve we can not only meet your expectations but exceed them.

In more recent years the company has heavily invested in stock availability for ball, butterfly, check, gate, globe and solenoid valves available in a range of materials, sizes and end connections. State of the art testing equipment

enables us to offer same day despatch for all actuated valve packages including pneumatic and electric up to 48" for all Safe Area and Hazardous Area requirements.

Working alongside National Courier Services we also provide our own delivery transport through a fleet of vehicles, keeping us in control for critical requirements or schedules.

When you choose to work with Actuation Valve, we take the time to understand your business and build relationships for the future. You can rest assured that once the project ends, our commitment remains and after-sales support is accessible 24/7.

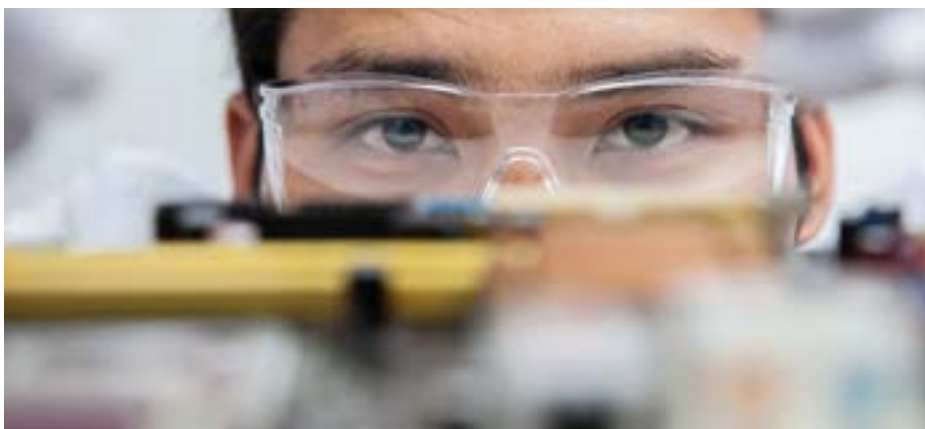

Marine

Actuation Valve has extensive experience working within the Marine and Offshore industry sectors providing quality product solutions for some of the most remote and demanding environments. Having established relationships and distribution agreements with some of Europe's leading non ferrous Valve Manufacturers we have built up comprehensive UK stock availability for Valves, Actuators, Strainers & Ancillary items.

Construction materials including Bronze, Aluminium Bronze, Titanium, Duplex, Monel and additional high alloy materials, Actuation Valve remain the first choice supplier to many leading Marine based companies with the ability to deliver rapid solutions for any application.

Typical product supply within the Marine sector include Valve & Actuation solutions for Fire Protection, Wastewater, Potable Water, Cooling, Ballast, Desalination & Ship Side Valves. Having set the blueprint for British Royal Naval Fire Protection systems, our team of design engineers have developed innovative solutions so robust, we can provide continuous valve operation support in the event of a torpedo hit. Currently serving on all Type 45 Destroyer Ships & HMS Queen Elizabeth and HMS Prince Of Wales Aircraft Carriers.

Food & Beverage

Actuation Valve work with some of the worlds leading Food & Beverage Manufacturers having built up a reputation for providing, safe and efficient solutions to an industry with no room for compromise. Working to specific standards including FDA, CSA, UL, NSF, IECX & FM, we are able to offer cost effective solutions to help keep your Food/Drinks facility operating at maximum capacity.

With Food & Beverage, Valve, Actuation and Ancillary products forming two separate groups of classification (Products with direct contact to food materials and products handling utility services) it is imperative that the correct specification is selected from the first point of enquiry. Our team of technical sales engineers have over 80 years of combined experience within this sector and can specify the correct product for your application confidently and quickly.

We recognise that poor design and quality of food handling equipment can have a serious effect on product safety and we work to stringent recognised standards to support you through the full process of manufacturing. All product services coming into contact with food substances are easily cleaned whether this be by manual strip down or CIP, avoiding unnecessary costs with the requirement of longer cleaning cycles and more aggressive chemicals.

Large UK stock supplies for Ball Valves, Butterfly Valves, Check Valves, Actuators and Flow/ Measurement Control & Instrumentation make Actuation Valve the perfect choice for Food Processing, Carbonated Drinks, Confectionary, Dairy, Agriculture, Bakery & Chilled or Frozen product supply.

Chemical

Actuation Valve have been providing Chemical Processing solutions since the mid 90's with products capable of handling some of the worlds most corrosive and hazardous materials. Whether you are looking for processing, movement or storage, our high quality Valve, Actuator & Ancillary products provide safety and reliability to service your exact application requirements in a variety of material and surface finishes.

In a highly competitive market, our energy efficient, innovative full flow designed products will allow you to reduce operational costs whilst boosting production and increasing profitability. At Actuation Valve, we can not only meet your Chemical application requirements, but exceed them.

Organic, Inorganic, Consumer Health, Agriculture, Pharmaceutical, Petrochemical & Food are just some examples of the processes incorporating our products.

Our High Performance Valves and Automation service (Up to 48" in house) enable us to offer a complete package of design, sales, assembly and testing under the same roof from our modern facilities.

Working alongside national courier services, Actuation Valve also provide our own delivery transport. Add this to our extensive stock levels we can provide a reliable 24/7 delivery service for almost any product supply should an emergency breakdown affect production, reducing any unnecessary downtime.

Water & Wastewater

Actuation Valve currently service some of the UK's largest Water and Wastewater providers and have established a reputation for providing quality, cost effective, fit and forget solutions at short notice through extensive stock facilities.

Our products include Manual & Electrically Actuated Butterfly Valves, Ball Valves, Check Valves, Gate Valves, Plug Valves & Control Valves with materials such as Cast/Ductile Iron, Carbon Steel, Stainless Steel, Bronze & Aluminium Bronze. With innovative product designs, we have improved productivity, compliance and sustainability with services you can depend on when you need them.

Our Valves specifically designed for Sewage and Wastewater, provide superior corrosive and resistance performance to maximise life

expectancy with uniquely developed flow patterns reducing energy costs in the process. With water being the worlds most important and precious resource, as our population increases, our demand for and ability to provide efficient and reliable Water & Wastewater facilities does too.

It is a legal requirement for Manufacturers to protect the environment. Once water has been used it must be treated prior to re-entering the supply. At Actuation Valve, we have the ability to manage your requirements and maintain water processing equipment whether this be for Wastewater, Potable water, Pools or Spas.
