About MSF GmbH – Precision in Every Filter

Founded in **2017** by two highly skilled individuals, **Kai Starke & Finn Mathys**, **MSF GmbH** was built on a foundation of deep technical expertise in onboard filtration systems, and a clear understanding of spare part demands from ship managers and owners. With a strong vision and relentless commitment, they set out to redefine the manufacturing and supply of filter spares, delivering German-made quality at manufacturer-direct pricing.

Filtration and fluid products

What started as a focused offering of 200–300 items has grown exponentially into a robust inventory of over 100,000 filter and fluid management products across all major marine brands. MSF's mission is simple but ambitious: to be the most complete and reliable source for every filter a vessel might need, from main engines to freshwater systems.

Today, MSF GmbH operates two large warehouse hubs in Hamburg, a testament to the growing demand and trust placed in the company by marine traders and fleet operators worldwide. One warehouse wasn't enough, we built two to keep up with the scale and urgency of marine supply.

Filtration and fluid products

Sub-Categories of our Filter Applications

Marine & Offshore

- Main Engine Filters (fuel oil, lubricating oil, coolant)
- Auxiliary Engine / Generator Filters
- Hydraulic Oil Filters (steering gear, deck machinery, cranes)
- Air Intake Filters (turbochargers, blowers, HVAC)
- Oil Mist Separators
- Bilge Water / OWS Filters
- Ballast Water Treatment Filters
- Freshwater Generators & UV Sterilizer Filters
- Purifier / Separator Filters
- Compressed Air & Breathing Air Filters
- Fuel Supply & Transfer Pump Filters

Automotive & Heavy Machinery

- Engine Oil Filters
- Fuel Filters (gasoline, diesel, biodiesel)
- Air Intake Filters
- Cabin Air Filters
- Transmission & Hydraulic Filters (excavators, loaders, mining trucks)

HVAC & Building Systems

- Air Conditioning Filters
- Ventilation & Dust Filters
- HEPA & ULPA Filters (hospitals, clean rooms)
- Water Filtration in Cooling Towers

Industrial Applications

- Hydraulic & Lubrication Systems (presses, turbines, gearboxes)
- Pumps & Compressors (oil, air, gas)
- Process Water Filtration (cooling water, boiler feed water)
- Chemical Process Filtration
- Food & Beverage Filtration (sterile air, water, oils)
- Gas & Steam Turbine Filters
- Dust Collection & Industrial Air Filtration
