

# Information regarding dangerous goods, for **UNIGRIP** products from SepcoTech

---

## Easy Logistics – No Dangerous Goods Classification

While certain epoxy products are classified under UN 3082 due to environmental considerations, many of them are not treated as dangerous goods when packaged in accordance with international transport regulations.

With proper packaging, these products:

- Meet Limited Quantity requirements – allowing standard shipping.
- Require no special handling for road (ADR) or sea (IMDG) transport.
- Are exempt from marine pollutant markings when shipped in units below 5 l. or 5 kg. (applies to ADR, IMDG, and IATA regulations)
- Labels and packaging required unless LQ/EQ exemptions apply.

This means fewer restrictions, faster dispatch, and easier global delivery – all while complying with ADR and IMDG rules.
